- 99 Needs Assessment
- 113 Strategies & Recommendations
- 129 Implementation
- 135 Appendix

Introduction

Chapter One: Introduction

Plan *n*. − **1.** a scheme of action or procedure: *battle plan*. **2.** a project or definite purpose: *plans for the future*. 3. to project a plan, act, or course of action for: *to plan one's vacation*. **4.** to make plans: *to plan ahead, to plan for one's retirement*.

Why the Plan was Developed

Recently ranked as the 36th fastest growing suburb in the nation, Frankfort is a premiere community with award-winning schools and exceptional residential, commercial and industrial development. Because of the growing population and increasing recreational demands, the Frankfort Park District sought to evaluate their current assets and establish an action plan to guide their next five years. This plan will:

- Assess and identify park and facility needs
- Assess and identify recreational needs
- Develop strategic, measurable, and obtainable recommendations
- Develop a five-year action plan for implementation and funding

Goals of the Process

The goals for this Comprehensive Master Plan include:

- Assess the needs of the current population
- Determine what improvements, changes or additions should be made to existing parks and facilities
- Plan for new park and open space
- Enhance and establish local and regional trail linkages
- Develop a prioritized list of goals, targeting an initial five-year assimilation period

Planning Process

The planning process began in the spring of 2013 with an extensive inventory and analysis of the District's land holdings, facilities, and social and economic context. Next, the Park District Board, staff, and community survey provided insight on the issues and needs facing the Frankfort Park District. Visioning sessions and charrettes helped the team to then develop the master plan recommendations and, after input and review from Board and staff, prioritize the action items for the five-year implementation plan.

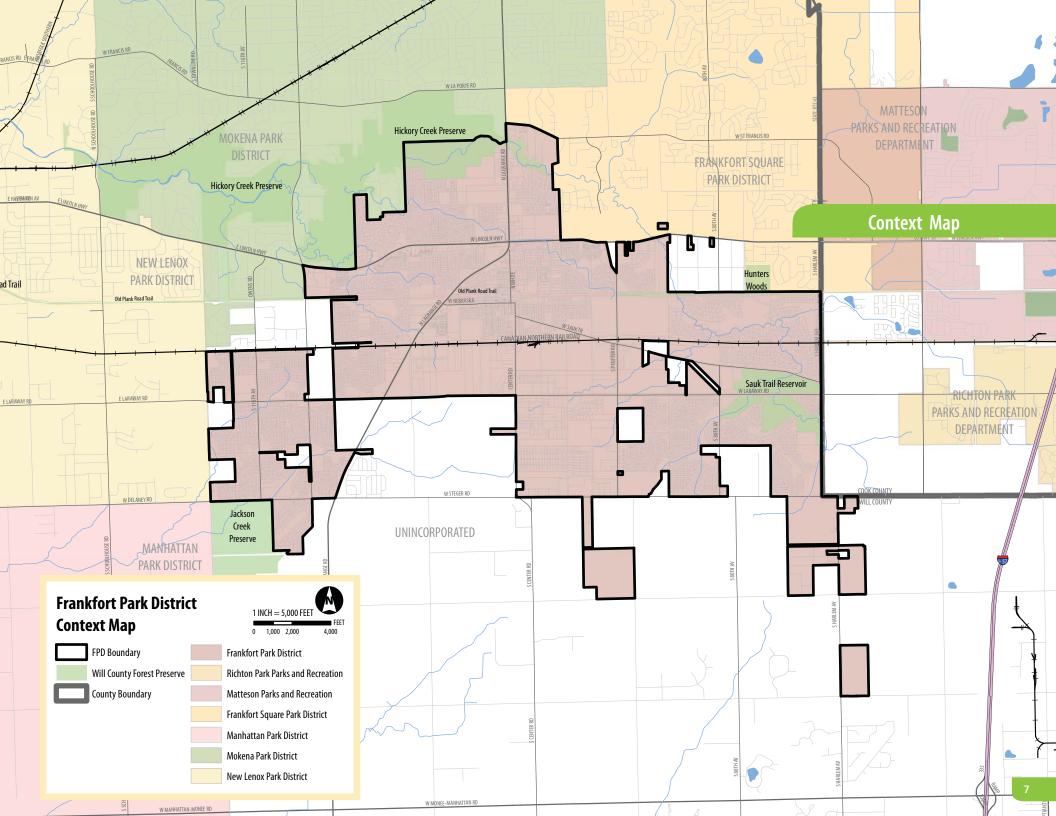

How the Document Should be Used

This master plan document should be used by the Park District's staff and park board as a guide for development to determine the primary action items over the next five years. The plan should be thought of as a "working list" and items should be checked off the list once they have been completed.

Planning Area Summary

The Planning Area for the Frankfort Park District is approximately 14 square miles. The Park District boundary is surrounded by adjacent recreational agencies and over 2,100 acres of county forest preserves. The following recreation agencies share boundaries of the Frankfort Park District:

- Frankfort Square Park District
- · Manhattan Park District
- · New Lenox Park District
- Mokena Park District
- · Matteson Recreational Division
- · Richton Park Parks and Recreation Department

Structure of the Document

Chapter One: Introduction

Provides a summary of the planning area and adjacent agencies. Documents the relevant history of the Frankfort Park District. References other relevant planning documents used during the development of this plan.

Chapter Two: Inventory & Analysis

Provides a detailed map identifying all parkland, open space, park facilities, schools, trails and relative adjacent land uses. Classifies all of the Frankfort Park District's parkland based on standards, size, location, and amenities. Documents the Park District's level of service analysis for park and open space acreage and indoor facility square footage. Provides equity mapping exhibits of park, open space, facility and trail service areas.

Chapter Three: Park & Facility Inventory

Catalogues individual parks and natural areas documenting observations on each property's natural resources and environmental conditions, site design and aesthetics, health, safety, and compliance, and users and context. Provides aerials and site photographs. Catalogues individual indoor facilities, documenting observations on each building's site and facility conditions, code compliance, programming and users. Provides floor plans and site photographs. Lists recommendations and considerations.

Chapter Four: Needs Assessment

Documents the park, facility, and recreation needs of the community, based on the results from the community needs survey, Park Board discussions, staff recommendations, and local trends. Identifies current issues based on information gathered during the Inventory and A nalysis phase.

Chapter Five: Strategies & Recommendations

Identifies specific projects and improvements for the following categories:

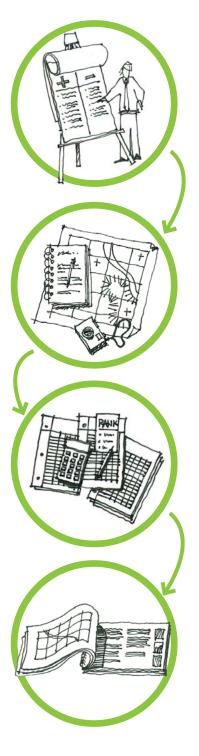

- Districtwide Strategies
- Existing Parks, Open Space and Indoor Facilities
- New Parks, Open Space and Indoor Facilities
- Trail Corridors and Linkages
- Recreation Programming

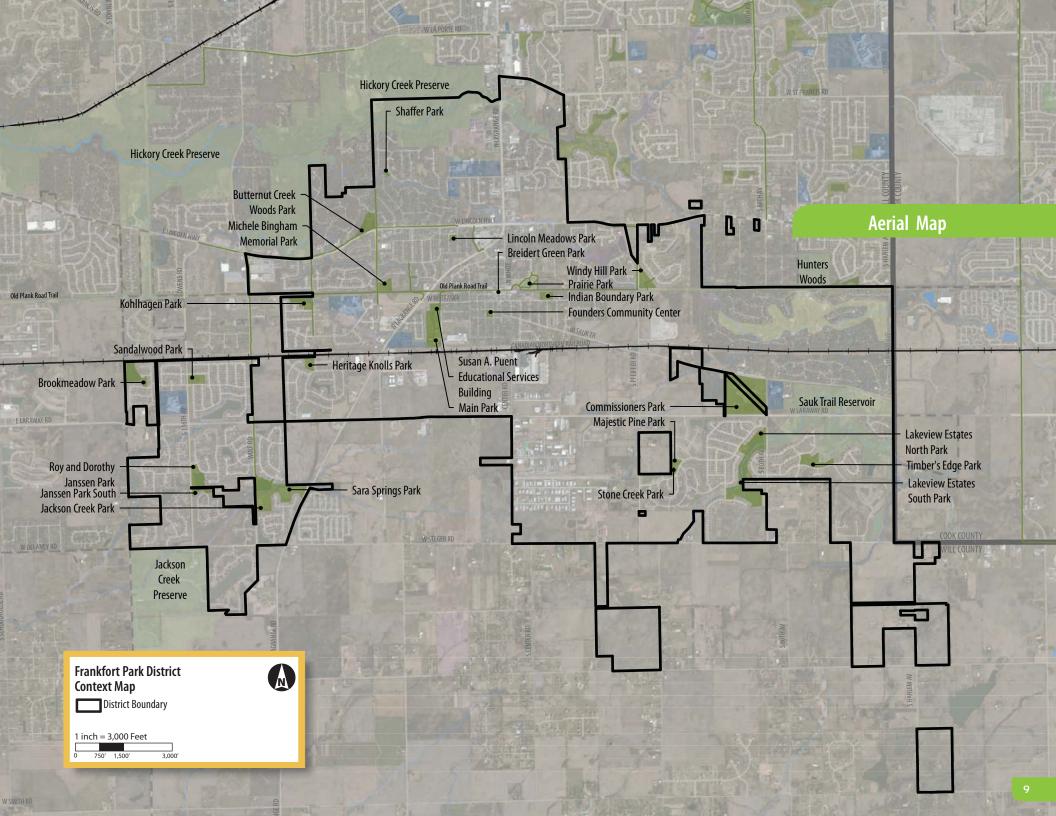

Chapter Six: Implementation

Identifies action items directly related to the plan recommendations and determines short term (1-3 years) and long term (5 years) priorities. Provides important dates for grants and other applicable funding sources.

Chapter Seven: Appendix

Raw information from community needs assessment, meeting summaries, and excerpts for other planning documents.

Frankfort Park District Profile

Geographic Location

The Frankfort Park District is located in northwest Will County, Illinois, on the Will-Cook County border and covers an area of 14 square miles according to 2012 Environmental Systems Research Institute (ESRI) data. Neighboring villages includes New Lenox, Mokena, Manhattan, Matteson, and Richton Park. Neighboring park districts and recreation departments include Frankfort Square Park District, Matteson Recreation Division, Richton Park Parks and Recreation Department, Manhattan Park District, New Lenox Park District, and Mokena Park District.

Service Statement

The Frankfort Park District is committed to providing responsive, friendly, courteous and excellent service to our customers.

Mission Statement

It is the purpose of the Frankfort Park District to design, provide and maintain park facilities, open space and recreation programs in the most functional, attractive and fiscally responsible manner possible, and to meet the needs of its residents by utilizing volunteers through civic and intergovernmental agreements.

Customer Service Philosophies

- Customers are entitled to efficient/friendly service from knowledgeable, motivated and well-trained staff.
- Customers are our greatest assets.
- Customers are not dependent on us. We are dependent on them.
- Customers come to us with their needs and wants. It is our job to satisfy them.
- We listen to our customers and respond quickly to their suggestions and concerns.
- We seek to give each customer attentive service.
- We provide a welcoming environment for all customers.
- We search for innovative methods to improve our service to the customer.
- We treat all customers we encounter with respect and integrity.
- We will make every attempt to satisfy/exceed customer's expectations.
- If we don't take care of our customers, somebody else will.

Fort Frankfort at Commissioner's Park was built by the Frankfort community

Open water visitors can access for fishing.

Frankfort has been recognized with the Southland's Reader's Choice award for "Best Community."

History of the Park District

The Frankfort Park District was created by referendum in April 1967. The original park site is Main Park, a 25-acre park that sits across the street from the Eris Rudman home. Eris Rudman was instrumental in forming the park district. She and the Lions Club, maintained and built tennis courts and ball fields at the Main Park site. It was a community effort to form the district and to collect taxes to own and operate the parks and programs. The Eris Rudman Memorial Garden sits on the southeast corner of the The Founders Community Center.

The District owns more than 235 acres of land and leases an additional 14 acres. The agency offers a community center, 13 baseball fields, 14 softball fields, 15 soccer fields, two baseball fields, four tennis courts, 17 playgrounds, seven picnic shelters, seven bike trails, two volleyball courts, one sled hill, and two skate parks. In addition to a variety of recreational programs for all ages, the District has a splash pad and award-winning dog park.

Chapter Two: Inventory & Analysis

Purpose

The Inventory & Analysis Chapter of the report illustrates and describes the existing conditions of the Park District. The information in this chapter was used to develop a better understanding of the many factors impacting the Park District and individual park facilities. This chapter holds a wealth of information including detailed maps of the District that display locations of parks, trail, forest preserves and other relevant land uses, maps illustrating natural features and systems present within the District, and tables identifying all parkland, open space, and amenities. This chapter also includes the equity mapping analysis completed to analyze the park distribution and review the degree to which the Park District and it's systems are serving the District residents.

Existing Conditions

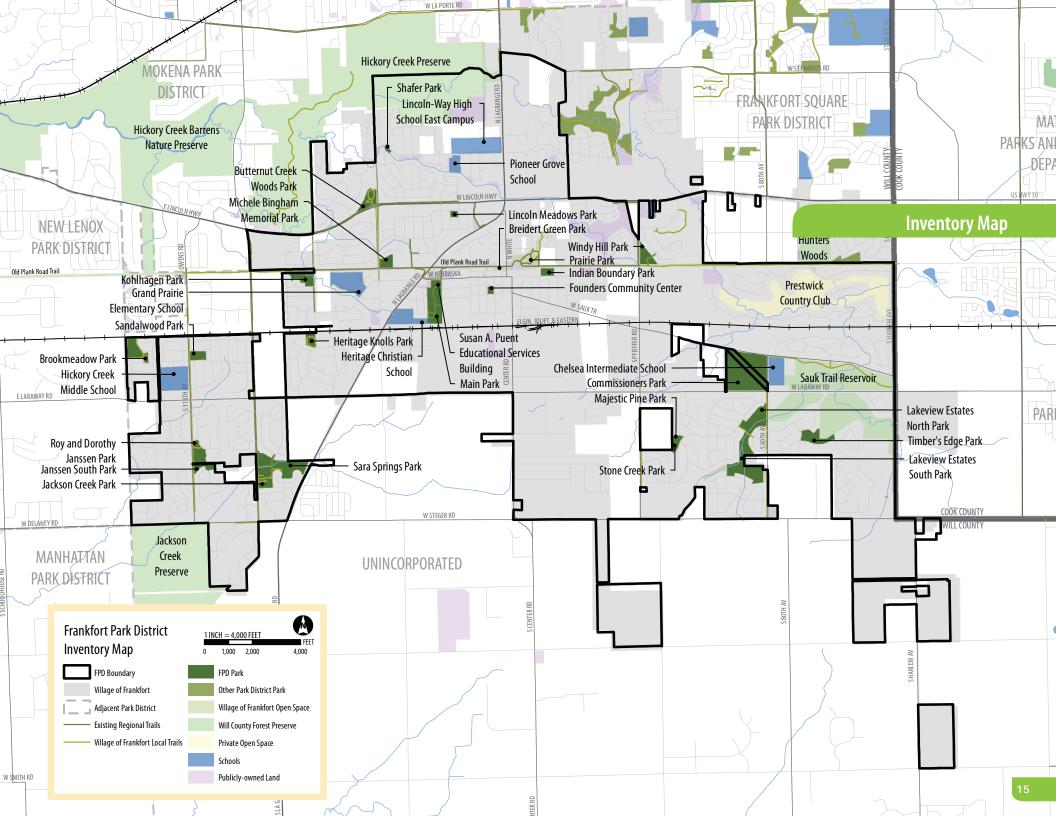

The Frankfort Park District lies on the edge of Will and Cook Counties and encompasses over 14 square miles of land. While primarily composed of residential land uses, the east central portions of the district are composed of industrial development.

Over 3,000 acres of forest preserves are adjacent and within the District, and the District itself owns 235 acres of parkland. In the next five years, an additional 25 acres will be added to the Park District's land holdings. The District also co-owns a park in the Frankfort Square Park District--Lighthouse Pointe Park--but as the park is maintained and primarily used by the Frankfort Square Park District it is not included in this plan. The District also has access to many of the area school districts and managing three facilities in-house--The Founder's Community Center, Susan A. Puent Educational Facility, and the Buildings and Grounds Facility.

North LaGrange Road is the main north-south corridor within the District while West Lincoln Highway and West Laraway Road serve as the primary east-west connections. The Elgin, Joliet, and Eastern Railroad is located centrally within the District and runs east-west. The main industrial developments within Frankfort are located off this rail corridor.

The Old Plank Road Trail serves as the sole regional trail through the District. This major trail connects Frankfort to New Lenox and other communities to the west.

The District is served by the Frankfort Community Consolidated School District 157C, and Lincoln Way Community High School District 210.

Frankfort Park District Demographics

The demographics review utilized the Environmental Systems Research Institute (ESRI) Business Analyst Software to gather the necessary, up-to-date demographics needed to gain a strong understanding of the District. ESRI is the largest research and development organization dedicated to geographical and information systems, including population projections and market trends.

Population Summary

The 2010 Census recorded the Frankfort Park District's population as 14,936, a 37.9% increase from 2000 Census estimates. According to 2012 estimates, the current population is at 15,244 and is expected to continue to increase by 9.8% to 16,741 by 2017.

Frankfort's median age is 41.7 years old. ESRI's 2012 estimates indicate a high percentage working age residents with 52.6% of the population between the ages of 25 and 55. The preschool age group makes up 5.9% of the population, the school age group makes up 24.4% of the population, the college age group makes up 4.1% of the population, and the remaining 13% is beyond retirement age.

According to the 2012 estimates, there are 5,045 households in the Park District with an average size of 3.0 members. The majority of these households are families (84.9%). The primary ethnicity is White (90.3%).

Population

2000: 9,270

2010: 14,936 (+37.9%)

2012 (estimate): 15,244 (+20.6%) 2017 (projection): 16,741 (+9.8%)

Population by Race and Ethnicity (2012)

90.3% White / 5.0% Black / .1% American Indian / 2.4% Asian /

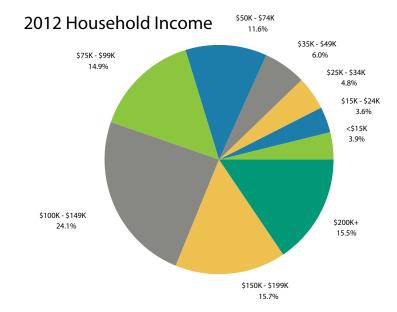

1.0% Other

4.7% Hispanic or Latino (any race)

Household Income Distribution (2012)

Median Household Income: \$106,468 Average Household Income: \$127,070

Per Capita Income: \$42,348

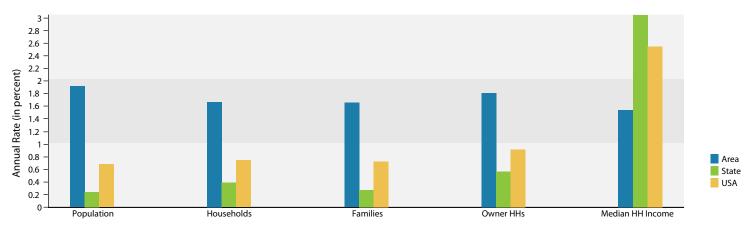

Trends 2012-2017

Estimates for 2017 (2012 estimates)

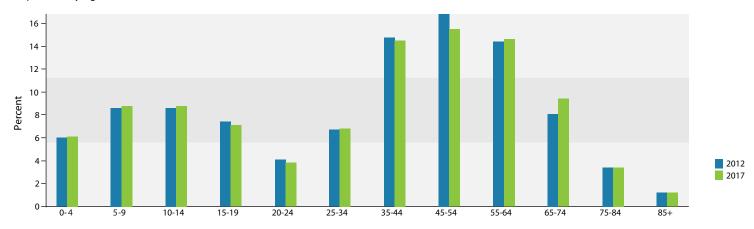

Population: 16,741 (*15,244*) Households: 5,213 (*4,799*) Families: 4,436 (*4,085*)

Owner-occupied Housing Units: 4,905 (4,485) Median Household Income: \$115,939

(\$107,409)

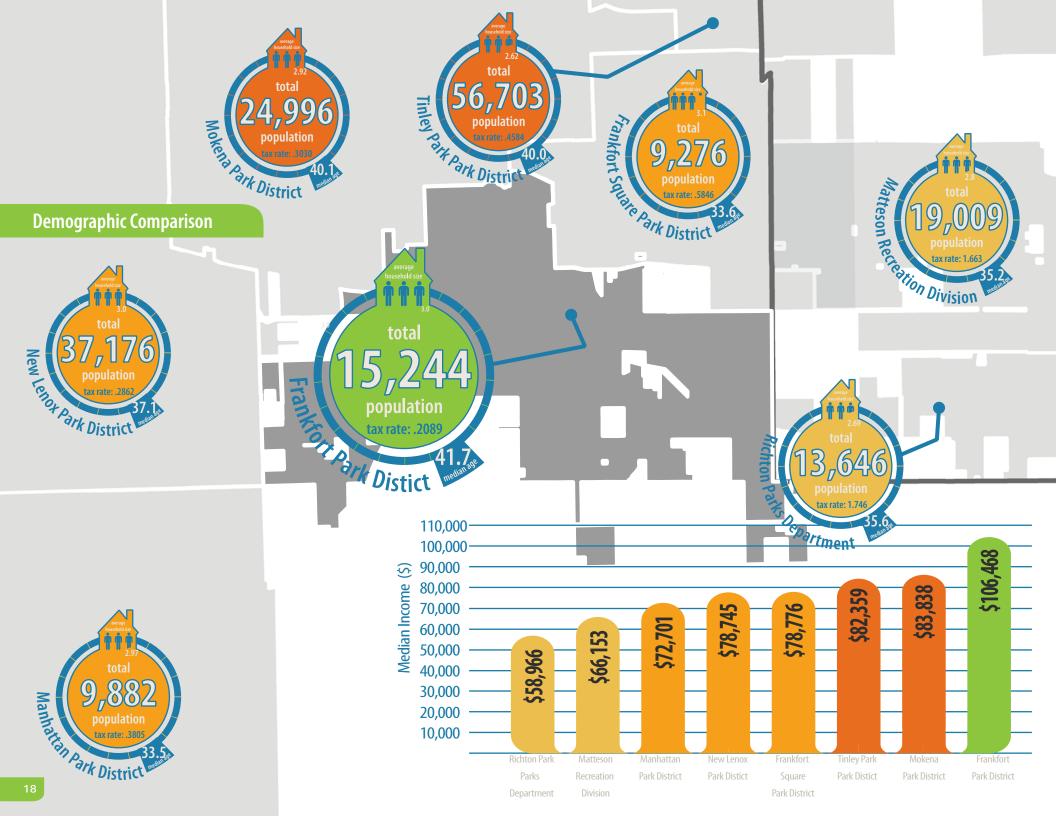

Population by Age

Population Trends

According to ESRI, the Frankfort Park District's population is expected to increase by a higher annual rate than both the State of Illinois and the nation (1.89% compared to .24% and .68% respectively). The number of households, families, and owner-occupied housing units will also increase at a higher rate than the State of Illinois and the nation from 2012 to 2017. The median household income; however, will increase at a much slower rate (1.5%) than compared to the State of Illinois (3.05%) and the nation (2.55%).

Into 2017, the population falling within the school age group will increase by 10% but remain a steady 24.4% of the total population. The amount of pre-school aged children will increase by 13.6%, but will remain a steady 6.1% of the population while the working age group will increase, but will make up less of the population than it did in 2012 (55.2% compared to 56.7%). The retirement age bracket will grow the most at 21.2% and will make up 14% of the total population by 2017.

Natural Resources Inventory

The Frankfort Park District is rich in natural resources including four major creeks and their associative riparian corridors, flood plains, major watersheds, jurisdictional wetlands, and gradual topography.

Watersheds & Riparian Corridors

The creek system running through the Frankfort Park District boundary includes Jackson Creek and its tributaries: Frankfort Creek, Prairie Creek, Hickory Creek and Forked Creek. All creeks run from the northeast to the southwest across the planning area. The Forest Preserve District of Will County currently has Resource Management Plans developed for all watersheds. In 2004, Openlands did "The Prairie Streams Watershed: A Habitat Protection and Restoration Strategy for Jackson, Prairie, Grant, and Forked Creeks." CMAP finished th eJackson Creek Watershed Plan in 2009 and Will County, the Village of Frankfort and others did a Hickory Creek Watershed Plan in 2011. Lastly, there is a Hickory Creek Watershed planning group.

Flood Plain

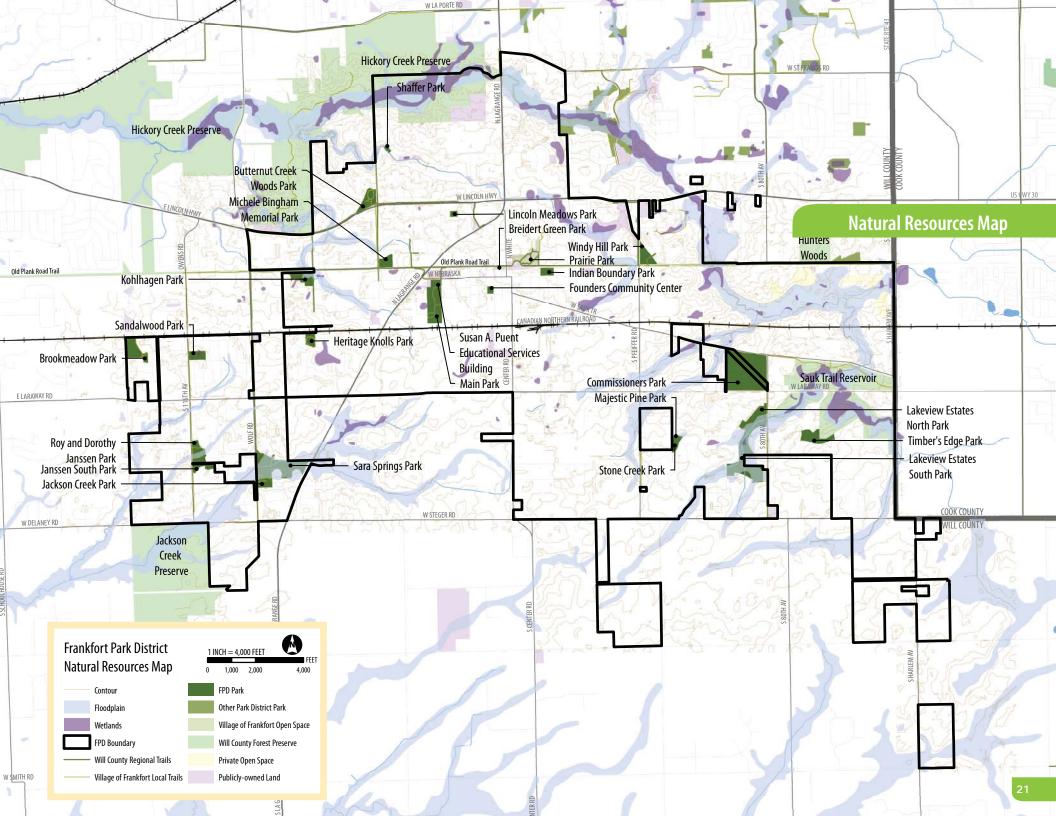

The Federal Emergency Management Agency through the National Flood Insurance Program produces Flood Hazard Boundary maps for areas prone to flood hazards. The 100-year flood plain associated with each of the creeks is shown in blue on the Natural Resources Map. The 100-year flood plain denotes the area potentially impacted by the level of flood water expected to be equaled or exceeded every 100 years on average or have a 1% chance of being equaled or exceeded in any single year. These areas are restricted from development in Frankfort. This floodplain protection has created the opportunity for natural and built connections along these corridors throughout the Park District.

Wetlands

Wetlands are lands saturated with water; this saturation impacts the soil character, the plant and animal communities and the surface condition of the land. Wetlands are regulated under the Clean Water Act. Wetland data from the National Wetlands Inventory conducted by the U.S. Fish and Wildlife Service is depicted in the Natural Resources Map. Most of the identified wetlands in the Park District planning area are emergent wetlands located along creek corridors. Other wetland types found in the planning area are forested wetlands and open water.

Topography

Topographic data obtained from U.S. Geological Survey maps was used to identify high points as well as low points within the planning area. The land does not appear to have significant grade changes or topographic features. However, the gradual change present across the site contributes to a grade change of 100' across the planning area. High points have been identified in the Natural Resources Map to note areas where significant views may be present within the planning area. Low points are also depicted and appear to follow the stream corridors and drainage patterns of the Park District.

Trail Corridors & Linkages Inventory

The Trail Corridors Map illustrates the existing trail corridors within the Frankfort Park District. The existing trails depicted on the map include the 22-mile long Old Plank Road Trail, a regional bicycle trail along the former Joliet and Northern Indian Railroad right-of-way. This trail extends from Joliet to Chicago Heights. This information was obtained through the Forest Preserve District of Will County, Will County GIS, and the Village of Frankfort. While the Village's goal is to provide bicycle trails, paths, and lanes, the Park District should focus on proposing trails within the parks themselves and providing connections from the parks to the Old Plank Road Trail. Analysis of the existing trail system can be found on pages 44 and 45.

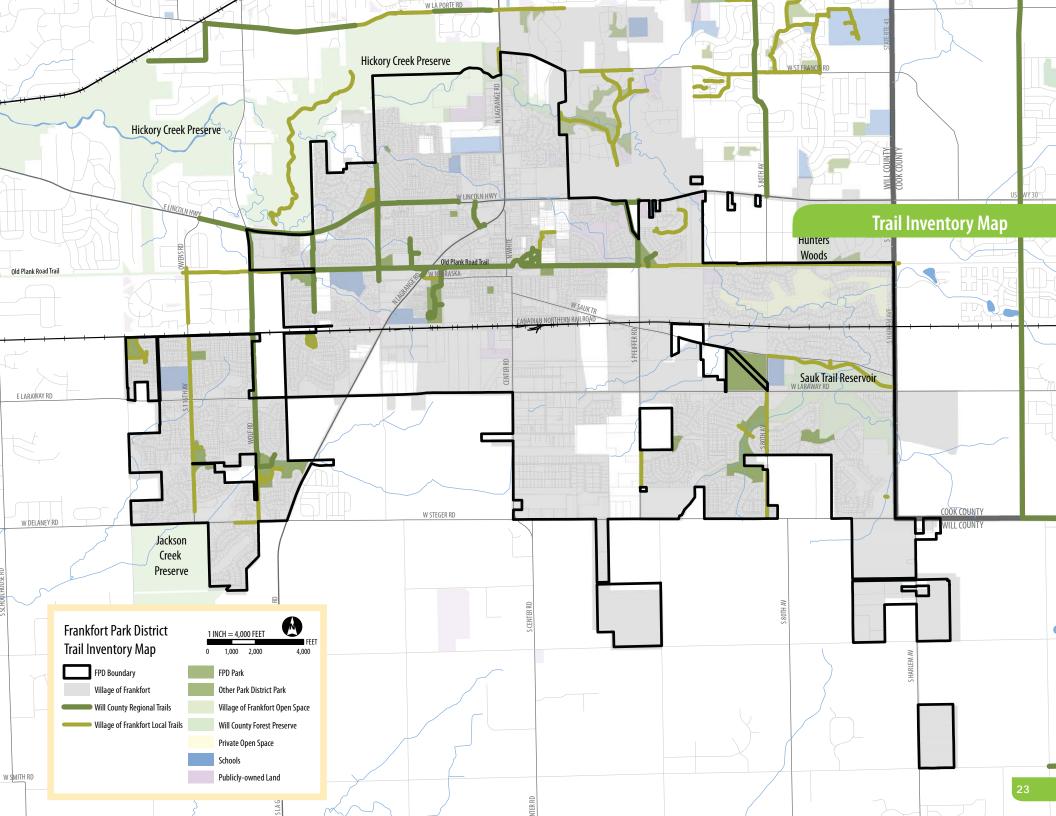

The "Guide for the Development of Bicycle Facilities" provided by American Association of State Highway and Transportation Officials recommends four different bike facility types. The bike facility types are described to the right. The Village of Frankfort's Bicycle Master Plan calls for planning and development of each type of bicycle route. Maps from the bicycle master plan can be found in the appendix.

Shared Roadway: A roadway which is open to both bicycle and motor vehicle travel. This may be an existing roadway, street with wide curb lanes or road with paved shoulders.

Signed Shared Roadway: A shared roadway which has been designated by signing as a preferred route for bicycle use.

Bicycle Lane: A portion of a roadway which has been designated by striping, signing and pavement markings for the preferential or exclusive use of bicyclists.

Shared Use Path: A bikeway physically separated from motorized vehicular traffic by an open space or barrier and either within the highway right-of-way or within an independent right-of-way. Shared use paths may be used by pedestrians, skaters, wheelchair users, joggers and other non-motorized users.

Park Classification Criteria

As a part of the planning process, we reference the guidelines outlined within the National Recreation and Parks Association (NRPA) - Park, Recreation, Open Space and Greenway Guidelines Manual. NRPA recommends creating a park classification system to serve as a guide for organizing an agency's parks. Mini Parks, Neighborhood Parks and Community Parks are the three different park types recognized by NRPA. The Frankfort Park District classifies their parks as either Neighborhood or Community, and does not have any Mini Parks. The park classification table identifies the criteria for determining the class for each of Frankfort's parks.

| | Park Classification | | | | | | | | | | |
|-------------------|--|---|---|--|--|--|--|--|--|--|--|
| Classification | General Description | Location Criteria | Size Criteria | | | | | | | | |
| Neighborhood Park | Neighborhood park remains the basic unit of the park system and serves as the recreational and social focus of the neighborhood. Focus is on informal active and passive recreation. | 0.25 to 0.5 mile distance and uninterrupted by non-residential roads and other physical barriers. | 1 to 5 acres in size is typical. | | | | | | | | |
| Community Park | Serves broader purpose than neighborhood park. Focus is on meeting community based recreation needs, as well as preserving unique landscapes and open spaces. | Determined by the quality and suitability of the site. Usually serves two or more neighborhoods and 0.5 to 3 mile distance. | As needed to accommodate desired uses. Usually a minimum of 20 acres. | | | | | | | | |

Table from NRPA's Park, Recreation, Open Space and Greenway Guidelines.

Neighborhood Parks

Neighborhood Parks remain the basic unit of the park system and are generally designed for informal active, passive recreation and community gathering spaces. Frankfort Park District's Neighborhood Parks generally range from 5 to 10 acres in size. Elements in these parks often include playgrounds, picnic areas, and trail systems. Neighborhood parks located in the Frankfort Park District include:

- · Brookmeadow Park
- Butternut Creek Woods
- Heritage Knolls Park
- Indian Boundary Park
- Kohlhagen Park
- Lakeview Estates North Park
- · Lakeview Estates South Park
- Lincoln Meadows Park
- Michele Bingham Memorial Park
- Janssen Park (North & South)
- Sandalwood Park
- · Shaffer Park
- Timbers Edge Park
- · Windy Hill Park
- Stone Creek Park (undeveloped)
- Majestic Pine (anticipated)

Neighborhood Parks are located in residential areas and serve neighborhoods within a 10-minute walk. Some Neighborhood Parks provide limited parking spaces. Neighborhood Park "service areas" do not include residents that must cross a planning area boundary. In a residential setting, **2.0 acres of open space** designated as a Neighborhood Park is preferred per every **1,000 people.**

Community Parks

Community Parks are generally designed for active recreation and focus on meeting community-based recreation needs. These parks preserve unique landscapes and open space, and often serve the community as gathering and general team sport spaces. Elements in these parks include playgrounds, pavilions, trail and path systems and multiple sport courts and fields. Community Parks located in the Frankfort Park District include:

- Commissioner's Park
- Jackson Creek Park
- Main Park
- Sara Springs (undeveloped)

Community Parks tend to serve the entire Park District. Community Parks are viewed as destination places and require travel by automobile for preferred programmed recreation, these parks include adequate parking. Community parks tend to be 1 mile to 3 miles in distance from residential areas. **7.5 acres of open space** designated as a Community Park is preferred per every **1,000 people.**

Parks, Open Space and Facilities Inventory

The planning team performed a site visit and evaluation for each of the Frankfort Park District's park properties to determine the opportunities and/or potential recommendations for improvements. Each site was visited and photographed, and staff provided information on how the park is used and any issues with the site or site amenities. The planning team also gathered aerial photography, acreage, property boundaries and floodplain information. Each park was evaluated on the following criteria:

- Natural Resources and Environmental Observations
- Site Design and Aesthetics
- · Health, Safety, and Compliance
- Users and Context

The following pages summarize the inventory for each park. The inventories are grouped by park classification: Neighborhood Parks and Community Parks.

Park and Facility Matrix

The table on the following page was completed for Frankfort Park District's existing parks, existing natural areas, and planned parks as a part of the Inventory & Analysis Phase of the master plan. It reflects the current inventory of the Park District's park acreage, uses and amenities. Each park was classified and grouped based on NRPA park classification standards and the park amenities were tabulated in order to understand the Park District's total recreational offerings.

Frankfort Park District is comprised of neighborhood and community parks, totaling over 250 acres of park space and managed land.

Inventory & Analysis

Indoor Facility Matrix

Frankfort Park District has three indoor facilities--two of which are programmed. These programmed facilities include The Founder's Community Center and Susan A. Puent Educational Services Facility. The third facility is the Buildings and Grounds Facility that houses maintenance staff and vehicles.

The table below reflects the current inventory of the Park District's square footage and types of indoor space in each building.

| | | TOTAL SQ. FOOTAGE | DAY USE FACILITIES | | | | | | | | ACT | TIVITY F | ACILIT | IES | | SPORTS FACILITIES | | | | | | | |

The Oaks at Mokena

The Founders Community Center

Susan A. Puent Educational Facility

Facility Comparison Analysis

The Frankfort Park District owns three facilities -- The Founders Community Center, Susan A. Puent Educational Facility, and the Building and Grounds Facility. Two of these facilities -- The Founders Community Center and Puent Educational Facility--are programmed. The District does not currently own or operate an indoor active recreation and fitness facility. The District does have programmable space at The Founders Community Center for dance, fitness classes, adult, and senior programs, but District residents must currently seek out private providers or attend the fitness center at the local high school for their indoor recreation and fitness needs. Puent Educational Facility is solely pre-school and early childhood programming.

The table to the right compares the amount of indoor programmable, recreation, and preschool space the Frankfort Park District has to adjacent Districts. This comparison analysis omits the Building and Grounds facility as maintenance spaces are not programmed. From this table, it is evident the Frankfort Park District does not have the same degree of access to indoor recreation space as neighboring Districts. While some Districts, like Frankfort, do not own indoor recreation facilities, many of them still have agreements and cooperations with other agencies so residents have access to indoor recreation and aquatics.

In terms of square footage, the amount of indoor recreation and aquatics space varies drastically, so this information is mainly to be used as a contextual reference to the amount of indoor recreation space available to surrounding communities.

Comparative Analysis

Level of Service

The Level of Service (LOS) guidelines are ratios representing the minimum amount of recreation facilities needed to meet the demands of a community. The LOS analysis is an integral step in determining a community's recreation needs and estimating how well an agency is serving the residents. According to National Recreation and Parks Association, the LOS should:

- Be practicable and achievable
- Provide for an equitable allocation of park and recreation resources throughout a community; there must be equal opportunity access for all citizens
- Reflect the real-time demand of the citizens for park and recreation opportunities

Parks & Open Space

According to the 2013 PRORAGIS Special District Report, similar agencies have a median of 12 acres of land per 1,000 population. Frankfort Park District has 15.43 acres of land per 1,000 population.

The NRPA's population ratio method (acres/1,000 population) emphasizes the direct relationship between recreation spaces and people and is the most common method of estimating an agencies level of service for parkland and open space. The baseline standard according to this method is 10 acres/1,000 population. The following tables calculate the existing and proposed Level of Service for the Frankfort Park District using this ratio.

Conclusions

The Frankfort Park District currently exceeds the NRPA recommended level of service for Neighborhood Parks by more than 92 acres; however, the District falls short in Community Park acreage by 9.35 acres. Overall, the total acreage owned and maintained as parkland is over the 10 acres/1,000 population as recommended by the NRPA. By 2017, the District will only be 4.36 acres short of the recommended 125.56 Community Park acreage.

While Frankfort is still growing, most of the developments noted on the 2007 PUD map (seen in Appendix) are not built out. However, the District does expect \$111,111 cash in lieu of land for park donations when Bowen's Crossing is entirely built out. While this does not add to the District's land holdings, the funds could be used for future acquisition.

Indoor Facilities

Level of Service (LOS) guidelines for indoor spaces is less concrete than the guidelines for parks and open spaces. Recently, through the use of their PRORAGIS application, the NRPA has developed a chart that relates population to facilities. This data, also derived from the PRORAGIS Special District Report can be seen at the bottom left. A benchmark commonly used for the Chicagoland area is 2 square feet per 1,000 of population with 1.5 acres consisting of indoor classroom-based or active recreation space and .5 consisting of indoor aquatics.

The tables to the right calculates the existing and proposed level of service for indoor facilities based on the 2 square feet per 1,000 of population. Note that the total indoor recreational space calculates only the total programmable space (30,173sf). This amount omits common space such as restrooms, hallways, and storage rooms.

Conclusions

The Frankfort Park District is well-served in terms of indoor recreation space but deficient in indoor aquatics. Note that the square footage total for the Building and Grounds Facility is not included as the facility is not programmed, and the square footage totals for The Founders Community Center and Susan A. Puent Educational Facility only calculates the total programmable space. These totals omit common space such as restrooms, hallways, and storage rooms.

This table, however, is slightly deceiving as the indoor recreation space that the District has is centered around instructor-led, classroom-based recreation such as art and pre-school classes. The District has one facility dedicated to pre-school programming, thus slightly skewing the ratio. The District does not have any indoor active recreation programming space such as multi-court gym facilities or fitness centers.

Equity Mapping Analysis

Not only is the quantity of park and open space important, but the location and geographic distribution of the parks themselves also offer an indication of how well a District is serving it's residents. By understanding where the parks are located in relationship to residential development, we are able to understand who, if anyone, is under served. This exercise may reveal the need for acquisition in under served areas of the District, or may reveal that the District is serving the residents well and should shift their focus into maintaining the system as it is.

Methodology

Planning areas are used for analysis, proposed land acquisition, and redevelopment of new park facilities. Planning areas are delineated by impassable pedestrian boundaries including major roads or highways, railroad corridors and extreme natural features.

Once the District was divided into planning areas, these areas and their boundaries were used to analyze the distribution of the parks and open spaces. First, a service area buffer--illustrated in the maps as an orange or light yellow circle--was created around each individual park. The size of the service area is dependent on the park classification. The table to the left notes the various service area distances for both Neighborhood and Community Parks.

Next, the service area buffers for Neighborhood Parks were clipped to the planning area boundaries in which the park is located. This is done because these boundaries are seen as impassible or nearly impassable by pedestrians. For Community Parks the boundaries were simply clipped to the overall District boundaries instead of planning area boundaries because these parks are seen as drive-to destinations.

Finally, the service area maps and other related maps were overlaid and analyzed to determine what areas are most and least served by the park system. The most served areas are illustrated by the dark orange while the least served areas are illustrated by the lack of orange. The orange service area buffers overlap to form a gradient that illustrates the degree to which residents are served. The darker the orange, the more service areas overlap. This represents those residents who fall within the darker orange area are served by multiple parks and their amenities.

| | Park Classification | | | | | | | | | |
|-------------------|--|---|---|--|--|--|--|--|--|--|
| Classification | General Description | Location Criteria | Size Criteria | | | | | | | |
| Neighborhood Park | Neighborhood park remains the basic unit of the park system and serves as the recreational and social focus of the neighborhood. Focus is on informal active and passive recreation. | 0.25 to 0.5 mile distance and uninterrupted by non-residential roads and other physical barriers. | 1 to 5 acres in size is typical. | | | | | | | |
| Community Park | Serves broader purpose than neighborhood park. Focus is on meeting community based recreation needs, as well as preserving unique landscapes and open spaces. | Determined by the quality and suitability of the site. Usually serves two or more neighborhoods and 0.5 to 3 mile distance. | As needed to accommodate desired uses. Usually a minimum of 20 acres. | | | | | | | |

Table from NRPA's Park, Recreation, Open Space and Greenway Guidelines.

Planning Areas

Planning Area 1 is bounded by LaGrange Road on the east, Lincoln Highway on the south, and the District boundaries on the north and west. The planning area is primarily zoned Singlefamily Residential and Forest Preserve with some Community Business and Office District parcels. Shaffer Park and Butternut Creek Woods Park lie within this planning area.

Planning Area 2 is bounded LaGrange Road on the west, Lincoln Highway on the south, and the District boundaries on the north and east. The area is zoned Community Business District, Office District, with areas of Single-family and Attached Single Family Residential. There are no parks within this area; however, there is access to the Hickory Creek Forest Preserve.

Planning Area 3 is bounded by Lincoln Highway on the north, LaGrange Road on the east, the Canadian Northern Railroad Line on the south, and the District boundaries on the west. The area is zoned primarily Single-family Residential. Kohlhagen Park and Michele Bingham Park lie within planning area three boundaries.

Planning Area 4 is bounded by Lincoln Highway on the north, Pfeiffer Road on the east, the Canadian Northern Railroad Line on the South, and LaGrange Road on the west. The area is zoned primarily Historic District, Single Family Residential, and Attached Single-Family Residential. Main Park, the Founder's Community Center, and Indian Boundary Park lie within this planning area.

Planning Area 5 is bounded by Lincoln Highway and the District boundaries on the north, the District and County boundaries on the east, the Rail Line on the south, and Pfeiffer Road on the west. The area is primarily zoned Estate Residential. Windy Hill Park is located within planning area five.

Planning Area 6 is bounded by the park district boundaries on the east and west, the railroad on the north, and Laraway Road on the south. It is primarily zoned Single-family Residential. Brookmeadow Park and Sandalwood Park lie within area six boundaries.

Planning Area 7 is bounded by the Canadian Northern Railroad to the north, LaGrange Road to the east, Laraway Road to the south, and the District boundaries to the west. The area is primarily zoned Single-family Residential with some office and commercial. Heritage Knolls Park lies within area seven boundaries.

Planning Area 8 is bounded by the Canadian Northern Railroad to the north, the District Boundaries to the east, Laraway Road to the south, and LaGrange Road to the west. It is primarily zoned Light and General Industrial. There are no parks within the planning area boundary.

Planning Area 9 is bounded by the Rail Line to the north, the District and County boundaries to the east, Laraway Road to the south, and the District boundaries to the west. The area is primarily zoned Estate Residential and Forest Preserve and there is one park--Commissioner's Park--located within this planning area.

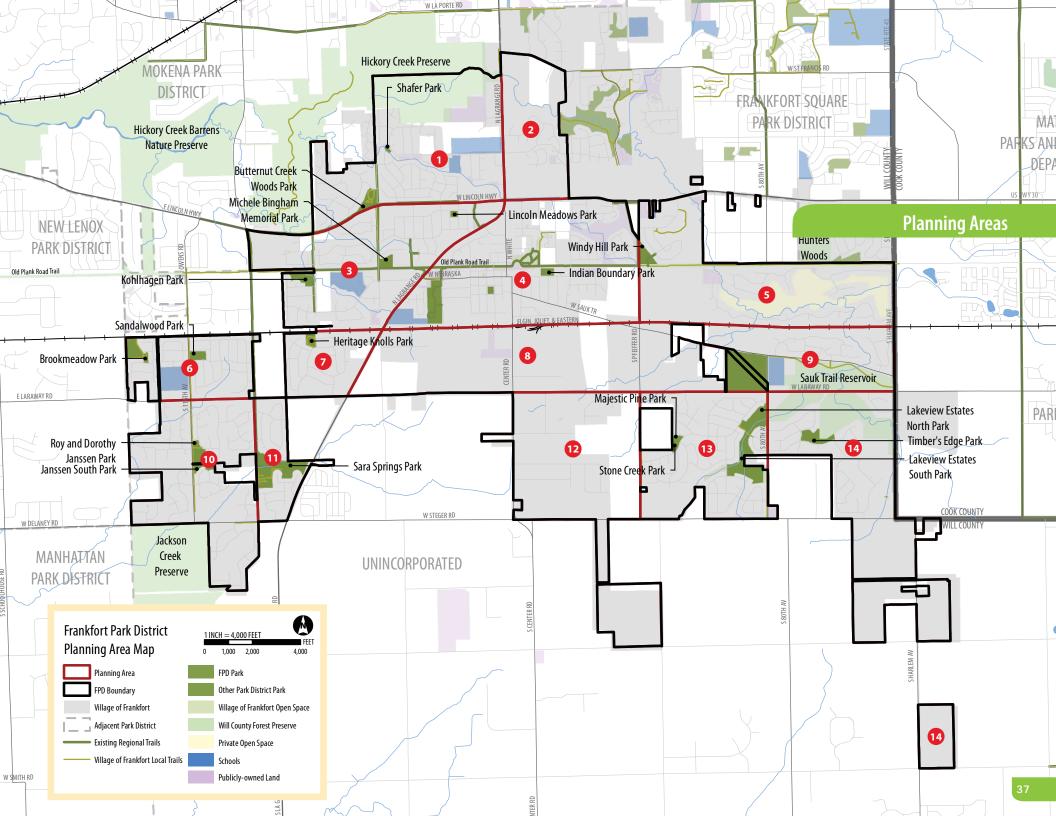

Planning Area 10 is bounded by Laraway Road to the north, Wolf Road to the east, and the District boundaries to the south and west. It is primarily Single-family Residential. Janssen Park North and South are located with the boundaries.

Planning Area 11 is bounded by Laraway Road to the north, the District boundaries to the east and south, and Wolf Road to the west. The area is zoned Single-family Residential. Jackson Creek Park and Sara Springs Park are within area eleven.

Planning Area 12 is bounded by Laraway Road to the north, Pfeiffer Road to the west, and the District Boundaries to the south and east. It is zoned Limited and General Industrial and does not have any parks within its boundaries.

Planning Area 13 is bounded by Laraway Road to the north, 80th Avenue to the east, the District boundaries to the south, and Pfeiffer Road to the east. It is zoned Single-family Residential and contains Majestic Pine Park, Stone Creek Park, Lakeview Estates North Park, and Lakeview Estates South Park.

Planning Area 14 is bounded by Laraway Road to the north, the District boundaries to the east and south, and 80th Avenue to the west. The planning area is primarily Single-family Residential, Forest Preserve, and Agriculture. Timbers Edge Park is located within this planning area.

Service Area Mapping

Neighborhood Parks

The purpose of the Neighborhood Park service area study is to determine which planning areas are under served by the Park District's existing Neighborhood Park land holdings. Frankfort Park District's Neighborhood Park acreages range from 1 to 20 acres. Currently the Park District has fifteen neighborhood parks and two planned Neighborhood Parks.

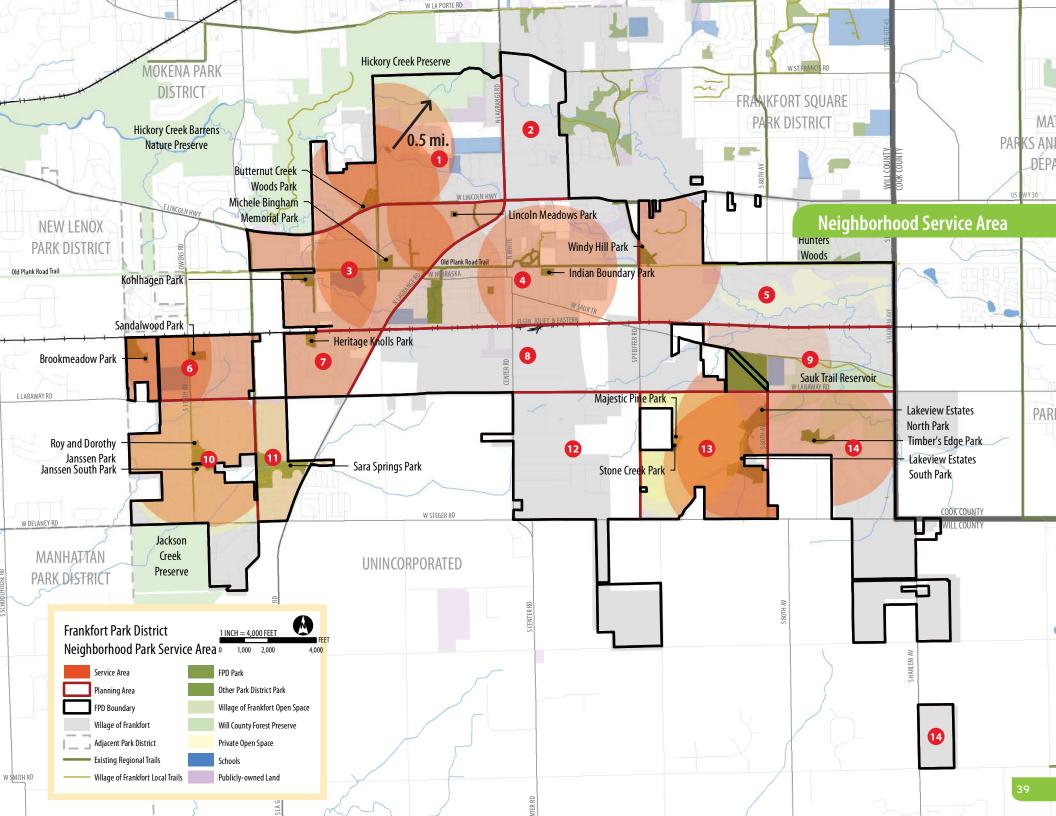

The Neighborhood Park Service Area Map illustrates a 0.5 mile service radius (shown in orange) around each existing and planned Neighborhood Park. This plan also illustrates a service area (shown in yellow) for Community Parks as these parks can also serve the function of a neighborhood park. NRPA's Park, Recreation, Open Space and Greenway Guidelines recommend that Neighborhood Parks with active recreation amenities be centrally located within their service areas and encompass a 0.5 mile radius.

Conclusions

Existing and planned neighborhood park distribution is concentrated in planning areas 1, 3, 4, 6, 7, 10, 11, 13, and 14. These Planning Areas are composed primarily of residential land uses. Planning Areas 2, 5, 8, 9, and 12 show a deficiency in Neighborhood Parks; however, some of the these Planning Areas--specifically areas 8 and 12--are primarily composed of industrial land uses and therefore contain few or no District residents. Planning Area residents in 2, 5, and 9 have limited access to Neighborhood Parks within these areas, but also have access to Forest Preserve land or private open space. The LOS analysis calculates a surplus of over 90 acres of Neighborhood Park land--making Neighborhood Park acquisition less of a priority for the District.

| Level of Service - Neighborhood Parks | | | | | |
|---------------------------------------|---------------------|------------------|-------------|-----------------------|--------------------|
| Classification | FPD Acreage (Total) | FPD Existing | IAPD/NRPA | IAPD/NRPA Recommended | Acreage deficiency |
| Classification | FPD Acreage (Total) | Level of Service | Recommended | Level of Service | / surplus (acre) |
| Neighborhood Park - Existing | 130.28 | 8.55 | 38.11 | 2.50 | 92.17 |
| Neighborhood Park - Planned | 138.90 | 8.30 | 41.85 | 2.50 | 97.05 |

Existing Population (15,244) Projected Population (16,741)

Community Parks

The purpose of the Community Park service area study is to determine which residential areas are under served by the Park District's existing Community Park land holdings. Frankfort's Community Parks range in size from 20 to 60 acres. Currently, the Park District has three Community Parks-- Commissioner's Park, Jackson Creek Park, and Main Park and one planned Community Park -- Sara Springs Park. The Park District also owns a parcel of land adjacent to Jackson Creek Park. This parcel is to become an addition to the Community Park.

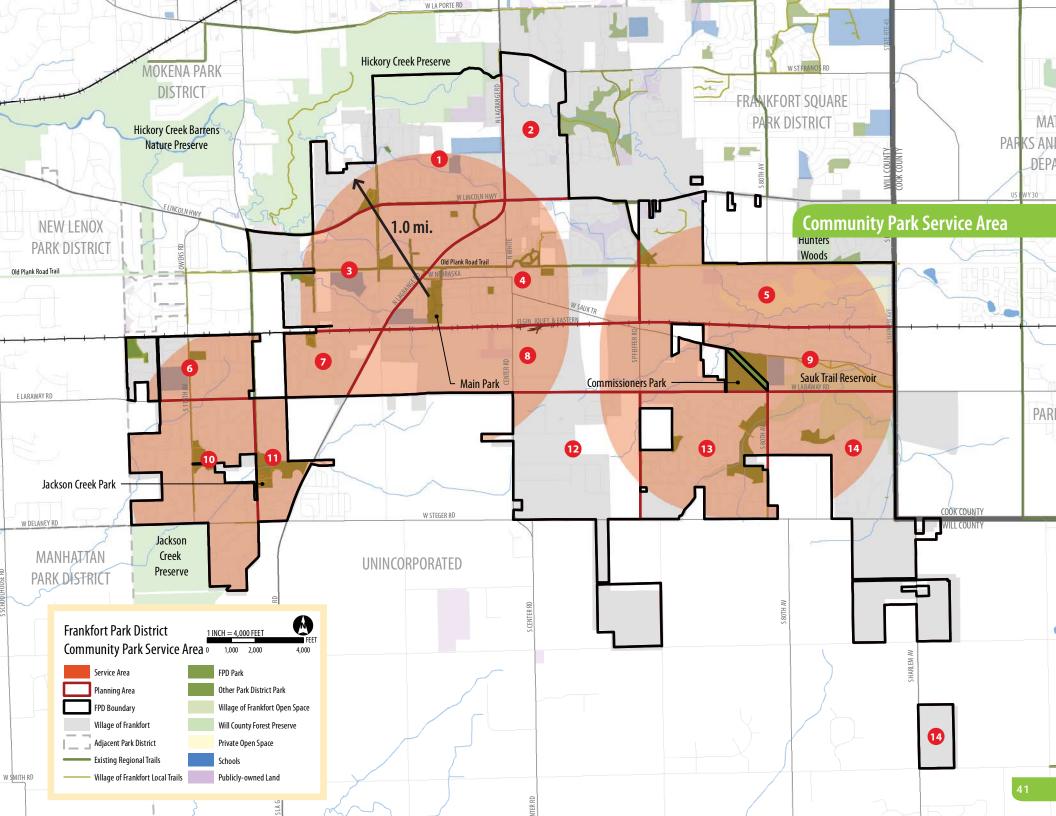

The Community Park Service Map illustrates a one-mile service radius (shown in orange) around each existing Community Park. The NRPA's Park, Recreation, Open Space and Greenway Guidelines recommend that Community Parks with active recreation amenities be centrally located within their service areas and encompass a one-mile radius.

Conclusions

Community Parks within the Frankfort Park District are **well distributed**. Jackson Creek Park serves the needs of residents within Planning Areas on the southwest side of the District, Main Park serves the needs of residents centrally located in the District, and Commissioners Park serves the residents within the east side of the District. The **LOS acreage analysis calculates a 9.35 acre deficiency**—that will shrink to -4.36 acre deficiency when Sara Springs is developed. While current distribution is consistent, Frankfort is still growing—with growth projected to occur in the southeast corner of the District. Therefore, acquisition or expansion of a Community Park may be required to adequately serve current and future residents.

| Level of Service - Community Parks | | | | | |
|------------------------------------|---------------------|------------------|-------------|-----------------------|--------------------|
| Classification | FPD Acreage (Total) | FPD Existing | IAPD/NRPA | IAPD/NRPA Recommended | Acreage deficiency |
| Classification | TTD Acreage (Total) | Level of Service | Recommended | Level of Service | / surplus (acre) |
| Community Park - Existing | 104.98 | 6.89 | 114.33 | 7.50 | -9.35 |
| Community Park - Planned | 121.20 | 7.24 | 125.56 | 7.50 | -4.36 |

Existing Population (15,244) Projected Population (16,741)

Overall Parks Service Area

The Overall Service Area Map illustrates comprehensively how well the Frankfort Park District parks and open spaces serve their residents. This map combines the previous two maps of Neighborhood and Community Park Service Areas in order to see who is most and least served throughout the District. The orange service area buffers overlap to form a gradient that illustrates the degree to which residents are served. The darker the orange, the more service areas overlap. This represents that those residents who fall within the darker orange area are served by multiple parks and their amenities.

From this map, we can conclude that the majority of the service areas are well-served by the District's parks. Most notably, **Planning Areas 3, 6, 7, 10, 11, and 13 are the most served.** According to the map, **planning areas 2, 4, 5, 8, 12, and 14 are the least served.** By overlaying the zoning map with the planning and service areas, we can conclude that although planning areas 8, 12, and 14 do not appear to be well-served, these areas are composed of industrial and agricultural development. Since their are few, if any, actual Park District residents living within these planning areas, acquisition and park development is not a priority for these areas. Because they are composed primarily of single-family and multi-family units, **planning ares 2 and 4 are deficient in service**.

Trail Corridors & Linkages

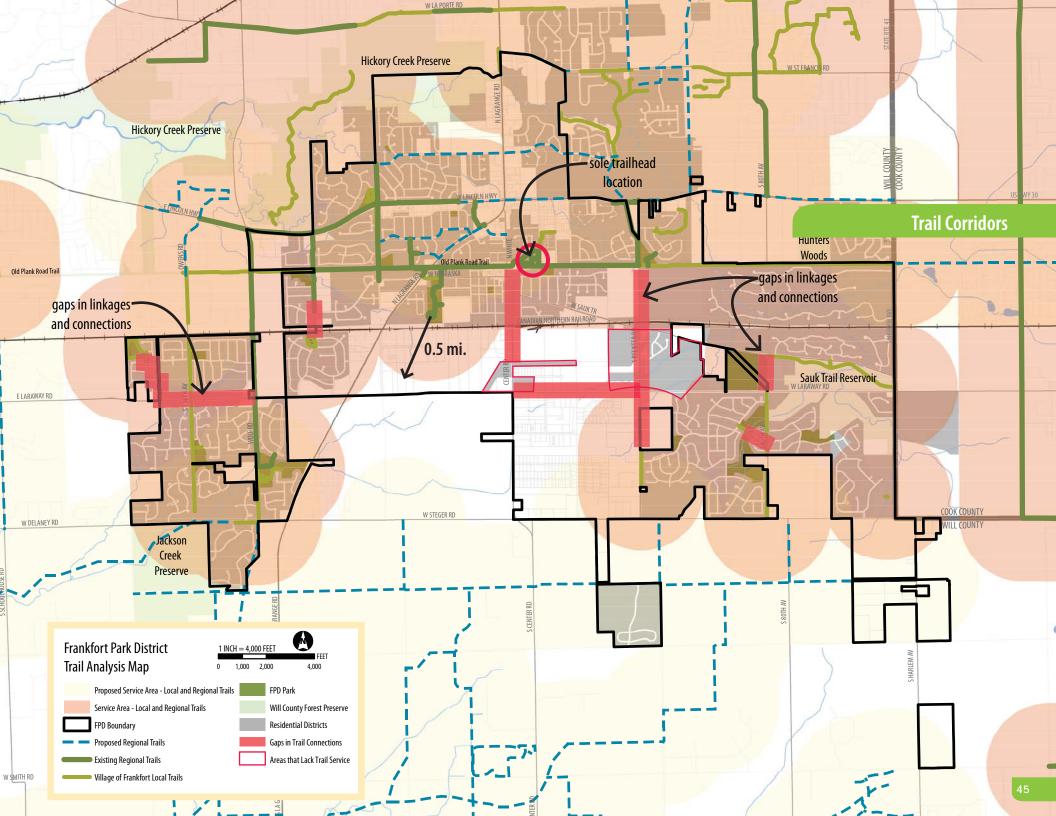

The Trail Corridors Analysis Map illustrates the existing and proposed trail corridors within the Frankfort Park District. According to the Village's Bicycle Trail Plan, goals and objective area:

- · Develop an inventory of existing trail systems
- Improve Frankfort's "Bike-friendly Community" rating by incorporating a balanced mix of bicycle lane types, incorporating wayfinding signage, and linking trail segments within the Village
- Update Master Bicycle Plan, ensuring to provide a trail within a half-mile of every resident, direct connections to important Village destinations, and direct connections to the Old Plank Road Trail
- Establish Trail System Design Guidelines
- Develop a Capital Improvement Plan
- Identify potential funding sources

According to the analysis, existing trails are well-distributed and all residents within the Park District are within a half-mile of a local or regional trail. The service area for existing trails is seen in the light orange while the proposed trail service area is seen in light yellow. There are two small residentially-zoned areas (outlined in light red) that fall outside the trail service area; however, these parcels are not developed as residential at the time of this study and are not considered a priority for trail access and development.

The distribution of trail assets is notable; however, some of these trails **lack direct connections to the Old Plank Road Trail** and are isolated within subdivisions and residential areas. Filling in these gaps would create a more cohesive network for District residents and encourage use of both the Old Plank Road Trail and District parks and assets. Some of the proposed trails do address the gaps in the trail system, but additional linkages to address are seen as red lines.

Currently, a trail head is located at Prairie Park--a Village-owned park north of the Old Plank Road Trail. A trailhead is the point at which a trail begins. Trailheads are locations where parking, drinking fountains, seatings, shade, and other amenities are consolidated in one space to encourage trail use. **The Park District itself does not currently offer trail head amenities in any of the parks along the Old Plank Road Trail, but there are numerous opportunities to do so.** Four of the District's parks are along the regional trail system-- Kohlhagen Park, Michele Bingham Park, Indian Boundary Park, and Windy Hill Park.

Recreation Program Analysis

Program Mix

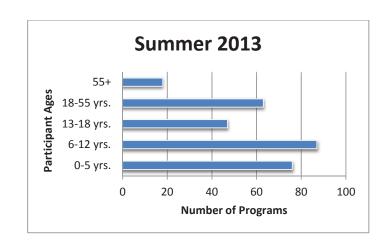

The program mix or the distribution of types of programs offered should represent the programming needs of the residents. Therefore, this should be evaluated annually through an assessment process. In addition, the program offerings should include emphasis on the delivery of core programs. In reviewing program offerings listed in the 2013 winter/spring and 2013 summer Brochures, the list of programs and number of activities offered included:

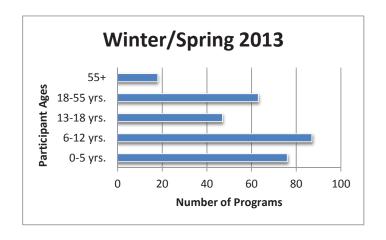

Summer 2013 results:

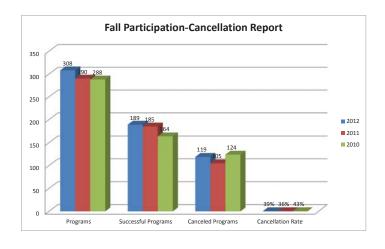

Winter/Spring 2013 results:

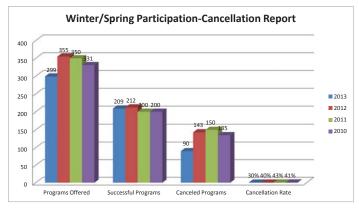

- Adult Athletics: 9
- · Adult Fitness: 16
- Adult Programs: 19
- · Before/After: 1
- · Community Events: 8
- · Gymnastics: 5
- · Martial Arts: 3
- Preschool: 5
- Special Events: 11
- Teen programs: 9
- Trips: 12
- · Youth Athletics: 14
- Youth Camps: 17
- Youth Dance: 5
- Youth General Programs: 57

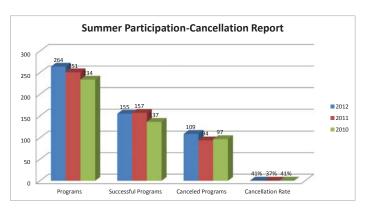

- Adult Athletics: 9
- Adult Fitness: 14
- Adult Programs: 22
- · Before/After school: 1
- · Community Events: 6
- Gymnastics: 5
- Martial Arts: 3
- Preschool Programs: 5
- · Special Events: 14
- Teen Programs: 7
- Trips: 13
- Youth Athletics: 23
- Youth Dance/Music: 6
- Youth General
- Programs: 47

Participation and Cancellation

According to the information provided by staff from the past three years of fall programs, the average cancellation rate has been 39.33%. The average cancellation rate according to industry, standards is 20%. This higher percentage of canceled programs in Frankfort can be occurring due to a variety of reasons including, but not limited to cancelling programs that barely miss minimum participation, fees may be too high, combining programs into one, offering the same program at different timeslots or not retiring a program that hasn't met minimum participation for a number of seasons.

The same can hold true for winter/spring and summer programming. The average cancellation rate is 38.5% over the past four winter/spring seasons. The average cancellation rate for the past three summers (not including 2013) is 39.66%. The goal should be to decrease this percentage, closer to the national average.

Participation totals by year for the Frankfort Park District are as follows:

2012: 5,969

2011: 5,964

2010: 5,025

The percentage increase in participation from 2010 to 2012 is approximately 19%, which is a significant increase, even more so as a result of limited programming space. This shows great effort by staff and represents excellent results in program development and offerings.

Program Guide

The 2013 Winter/Spring and Summer Brochures were reviewed. Below are highlights and suggestions to improve the best marketing tool the Frankfort Park District uses to communicate services, programs and information to customers.

Overall the Brochure is simple, concise and well organized. Currently, the Brochure is printed in two-color, other than the front and back covers (including inside covers). Some examples to help consolidate pages are:

- Cutting down on the number of pages can also save money so the savings can be used to provide a fullcolor guide.
- Consolidating and deleting unnecessary white space, can add room for additional photos and information.
- Side bars on pages are thick.
- Some program descriptions are lengthy.
- Identify the "hook" that will entice people to register.
 Descriptions should include features, attributes
 and benefits. Certain titles already state what the
 participant will be doing in the class. Some of the
 text in the description is informational, rather than
 promotional.
- Customers generally look at price first, and then program title and description to determine whether or not to register for a class.
- Changing the font for both the descriptions and headers can be an easy way to add a catchy new look to draw interest.
- Customers may be more attracted to programs and information if pages and pictures are bright and colorful.

Several nice features that the Brochures currently offer are:

- Continue using the front, back and inside covers to promote important events or programs.
- These pages are the most colorful on the higher quality paper.
- Using the branch-logo throughout catalog.
- Including the Facebook icon on various pages.
- Communicating Wi-Fi is available at The Founders Center.
- Highlighting programs on various pages with a picture.
- Highlighting special events on various pages.
- Including "New" with any new program.
- Including the Website address and phone number on the bottom of each page.
- Using the QR code throughout brochure to direct smart phone users to the website.
- Communities are becoming increasingly interested in what park districts are offering and what improvements or enhancements are being made. The "Parks Perks" pages provide great information to share with the community of Frankfort. The Executive Director's Message is another great tool to provide communication and highlight upcoming events/ programs and/or summarize the successes of the Park District.
- The call out box that provides a sneak peek at "Events Coming this..." is a great tool for the community to mark their calendars.

Chapter Summary

The goal of the Inventory & Analysis process is to develop an understanding of the many factors influencing the Frankfort Park District and its assets. The chapter documents the community's parks, natural systems, schools, trails and related land uses. The Park District's level of service and service area distribution were calculated and documented in this chapter. Finally, the park facility inventory was compared to Illinois and National averages to identify areas that the Park District may be deficient incompared to these recognized standards.

Currently, the population of Frankfort is 15,244 and is projected to grow by almost 10% into 2017. School-age children will remain a large (24.4%) portion of the population with the retirement age (65+) age group increasing to 14% of the total population. These demographics will have an impact on the programs, services, and amenities the District offers.

The Frankfort Park District has fourteen Neighborhood Parks and three Community Parks. The District also has four planned or anticipated parks --slated to be developed and programmed in the next five years. From an acreage standpoint, the District has sufficient Neighborhood Park acreage, boasting a 90-acre surplus. Community Park acreage, however, is deficient by 9 acres. With a growing community and deficiency in destination park space, acquisition or expansion of Community Parkland may become a priority for the District.

Currently, the Frankfort Park District owns and operates three facilities --The Founders Community Center, Susan A. Puent Educational Facility, and the Buildings and Grounds Facility. Two of these facilities --the community center and educational facility -- are programmed. Puent is solely preschool programming, while The Founders Community Center hosts, dance, fitness classes, meetings, banquets, and senior programming.

Indoor Level of Service falls below the recommended 2 square feet per person by only 351 square feet, so the Frankfort Park District appears to be adequately served in terms of indoor recreational space. This total, however, is slightly deceiving as the Frankfort Park District does not provide indoor active recreation or aquatics, instead providing an entire facility dedicated to pre-school programming. While Level of Service calculations appear to show sufficient indoor space, the District is limited on the services or programming they can provide within the current indoor space they have due to building size and layout. The average square footage for a recreation center based on the comparison table is 48,250. Frankfort Park District's total indoor space square footage falls below this average.

Observations

Natural Resources and Environmental Observations

- The park is not located in a floodplain or wetland.
- Park landscape is composed of turf and mature shade and evergreen trees.

Site Design and Aesthetics

- Park includes a playground with four to five year old 2-5 and 5-12 year composite play structures and 2 belt and tot swings each.
- The playground surfacing is engineered wood fibar with a wood timber curb.
- Site furnishings include benches and trash receptacles.
- Site has connection to other neighborhood components or parks within the overall system.
- · The park is well maintained and free of litter.
- · Park identification signs are not present.
- Park does not provide parking.

Health, Safety, and Compliance

- Park lacks street frontage and relies on immediate neighbors to provide surveillance and safety.
- · Park does not have security lighting.
- Rules signs are present.
- Park has internal connections between amenities and accessible routes.

Users and Context

- Users include drop in, neighborhood residents.
- Park is situated between single-family residential and open space and includes a large pond.
- The park does not have any active programming.

Observations

Natural Resources and Environmental Observations

- The park not located in a floodplain or wetland.
- Park landscape is composed of large shade trees and shade tolerant turf.

Site Design and Aesthetics

- Park includes a playground with 2-5 and 5-12 year composite play structures and 2 belt and tot swings each. Playground also includes a spring rocker play piece.
- Park also includes a large hexagonal picnic shelter.
- Site furnishings include benches, trash receptacles, and picnic tables.
- Site has connection to other neighborhood components or parks within the overall system.
- The park is well maintained and free of litter.
- · Park identification signs are present.
- Parking is not provided.

Health, Safety, and Compliance

- No accessible ramp into three playground areas.
- · Park does not have security lighting.
- Rules signs are present.
- Park has internal connections between amenities and accessible routes.

- Users include drop in, neighborhood residents.
- Park context consists of single family residential open space.
- The park does not have any active programming.
- The trail system within the park connects to the Old Plan Road Trail System.

Observations

Natural Resources and Environmental Observations

- The park is located in a wetland.
- This park includes a pond.
- Park landscape is composed of turf and shade trees.

Site Design and Aesthetics

- Park includes a playground with 2-5 and 5-12 year composite play structures and 2 belt and 4 tot swings each. Playground includes spring rockers.
- Playground has wood timber edging and engineered wood fibar surfacing.
- Site furnishings include benches, trash receptacles, and picnic tables.
- Site has connection to other neighborhood components or parks within the overall system.
- The park is well maintained and free of litter.
- Park identification signs are present.
- · Parking is not provided.

Health, Safety, and Compliance

- Park has street frontage and relies on passive surveillance.
- No accessible route into playground from path.
- Park does not have security lighting.
- Rules signs are present.
- Park has internal connections between amenities but no accessible routes.

- Users include drop in neighborhood residents.
- Park context is single-family residential and open space.
- The park does not have any active programming.

Observations

Natural Resources and Environmental Observations

- The park is not located in a floodplain or wetland.
- Park landscape is composed of turf and mature trees and vegetation.

Site Design and Aesthetics

- Park includes a playground with a 2-5 and 5-12 year composite play structures, 4 belt and 2 tot swings. The playground also includes freestanding climbing play
- Site furnishings include benches and trash receptacles.
- The park is well maintained and free of litter.
- · Park identification signs are present.
- Parking is not provided.

Health, Safety, and Compliance

- Park has street frontage for passive surveillance.
- No accessible entry point for individual to gain access to play equipment at Tanglewood Park. Does not allow accessibility to individual in wheelchair on swings. Playground lacks ground components compared to elevated play components for 2-6 year olds and ground components compared to elevated play components for 5-12 year olds.
- · Park does not have security lighting.
- Rules signs are present.

Users and Context

- Users include drop in neighborhood residents.
- Park context consists of single-family residential.
- The park does not have any active programming.

Undeveloped Parks

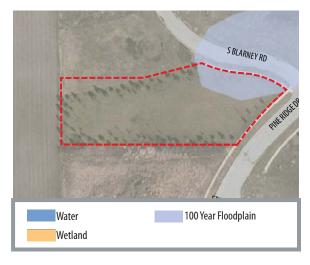

These parcels of land are parks that have been or will be deeded to the Park District. These parcels are undeveloped, though many have sidewalks and neighborhood connections in place. They are located in residential subdivisions and will be developed as neighborhood and community parks.

Majestic Pine Park

Majestic Pine Park is located north of Stone Creek Park. The northeast portion of the park is in the flood plan. Vegetation on site is currently shade tree, evergreen tree, and turf. This park, because of its adjacency to Stone Creek, should be developed in conjunction with Stone Creek. After development, this park will be classified as a Neighborhood Park.

Classification Neighborhood Acres 1.43 Tax Number 1909351020200000 Acquired anticipated

Janssen South Park

Janssen South Park is located south of Janssen Park. At this time, these parcels are not currently under District ownership; however, they will be deeded to the District in the near future, thus why this 'park' is included in the comprehensive master plan. Plans for this park include a softball / baseball field and soccer fields. Trails and other amenities will connect these parcels to Janssen Park and once developed, these parcels will be considered an additional to the Janssen Neighborhood Park.

Classification Neighborhood Acres 4.28

Tax Number 1909314010010000, 1909314010100000

Acquired 2012

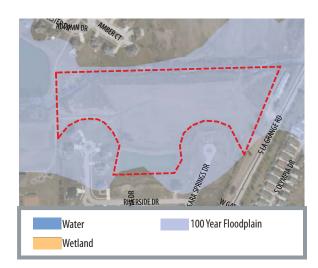

Sara Springs Park

Sara Springs Park is located directly east of Jackson Creek Park. The site is in the flood plan, making development of a recreation or programmed facility impossible. Although a structure is not feasible here, this site would be an ideal location for soccer, football, or other sports fields. Once developed, the park will be classified as a Community Park due to its adjacency, and future connections / additions to, Jackson Creek Park. One issue with this park; however, is that is its only accessible through Jackson Creek Park. There may be a future opportunity to purchase land along LaGrange Road to provide access to the park from the east.

The Founders Community Center

140 Oak Street

Observations

Site Conditions

- Parking is provided.
- Highly visible, located in center of downtown.

Facility Conditions

- Building has had two to three additions to the original school building structure.
- · Split levels.
- High percentage circulation inefficient layout.
- · Interior well-maintained.
- · Ramps connect lowest level with main entrance.
- · Elevator connects lowest level with second floor.
- Exterior is brick red/brown. Some EIFS at exterior of one story wing (Founders Room). Most brick is in good conditions.
- Windows replaced in 1997, Anderson, Insulated glass.
- · Roof recently replaced.
- Boiler (1996) in fair condition.
- 3 RTUs need replacement.

Health, Safety, and Compliance

- · Mostly noted ADA upgrades. Restrooms are okay.
- Kitchen and meeting room counters are at 36" height.
- Some issues with clearances/railing, but not significant.
- · Split levels result in difficult ADA access.

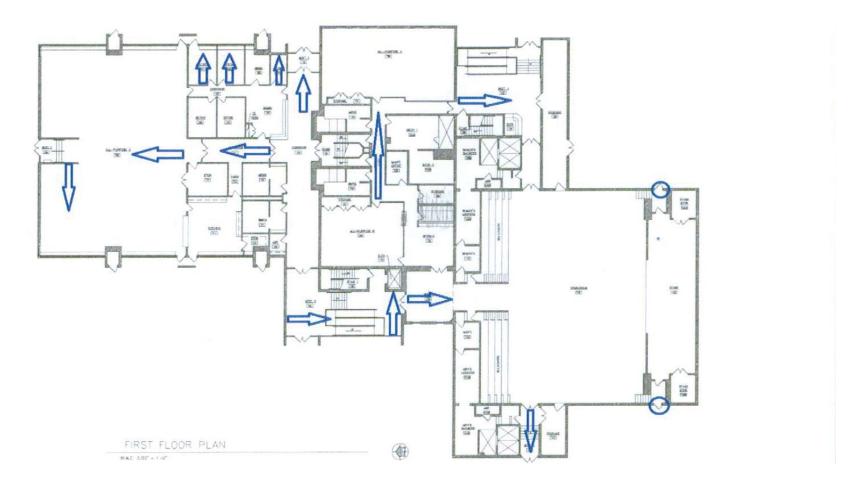

Users and Context

- Users include special recreation association participant, administrative staff, park board, drop in users.
- Building context is a mix of single-family residental and commercial.
- Building is staffed.

Programming

 Programming includes special recreation association programming, meetings, board meetings, administration staff, registration. Classification Indoor Facility Square Feet 31,670 Acquired 1995 Built 1925, reno 1938, 1995

Buildings and Grounds Facility

Locust Street

Observations

Site Conditions

- · Located in Main Park.
- · Parking is provided.
- · Access building through park.
- · Low street visibility, though not necessary.

Facility Conditions

- · Original wing built in 1987. Mostly used for storage
- Has one drive-thru bay, unit heater, and no A/C.
- New building built in 2007-08.
- Currently replacing bay lighting in new addition.
- Building currently serves the needs of the District.
- · Location on north side of community will create a long-term issue.
- · Radiant overhead heat in garage.
- Building generally in good condition.
- · Exterior integrally colored block walls.
- Sloped shingled roofs.

Health, Safety, and Compliance

• No apparent code issues.

Users and Context

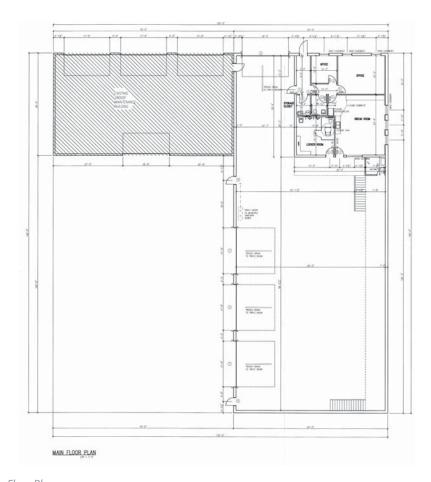

- · Users include maintenance staff.
- · Context includes Main Park and single-family residential.
- Building is staffed.

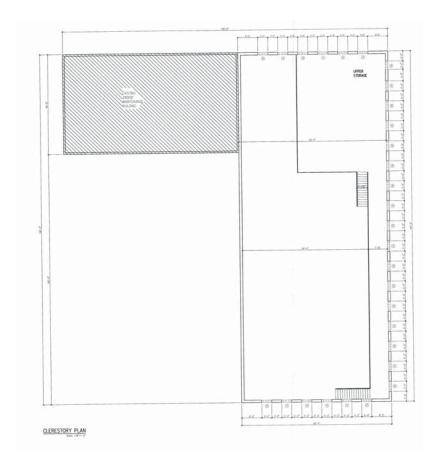

Programming

· Facility is not programmed.

Susan A. Puent Educational Center

400 West Nebraska Street

Observations

Site Conditions

- · Located near Main Park.
- Parking is provided.
- Access from Nebraska Street.
- · Highly visible.

Facility Conditions

- · Building was originally an American Legion. Was once used as Park District Offices. Now currently serves as a pre-school / early childhood education center.
- Two-story building with grade change. West (parking) at lower level. East at upper level via stairs/ramp.
- Exterior is brick upper walls, painted concrete lower walls. Walls in good condition.
- Gable ends, aluminum or vinyl siding, fair condition.
- · Roof, asphalt shingles, poor condition, needs replacement.

- Original building had head only boiler, fin tube radiation. Currently has 3 HVAC units with 5 remote conditioner units. Boilers serve hot water coil in duct.
- Interior in fair condition painted drywall, tile floors, popcorn painted ceiling.
- · Lower level classes rotate through building. Two primary classrooms (1) 20 kids (3) 10 kids. One multipurpose room, one small group room, one office, one kitchen, one unisex restroom in corridor and two off room 1.
- Upper level one large classroom, 24 kids, gross motor skills. Upper level has one men's and one women's restroom.
- Pre-case floor plank, 8' clearance at lower level.

Health, Safety, and Compliance

- East access ramp as questionable slope.
- · Access between floors is by stairs only, no elevator.

Users and Context

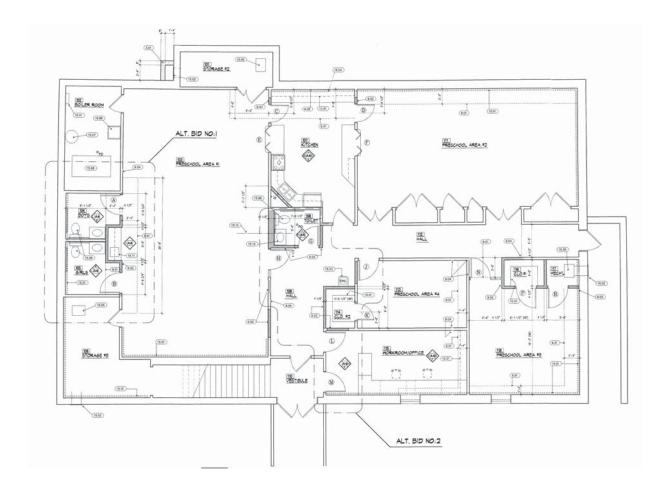

- Users include younger children, parents, teachers.
- · Context includes Main Park, single-family residential, and institutional.
- Staffed during pre-school hours.

Programming

- · Pre-school and early childhood classes.
- Currently no waiting list for enrollment.

400 West Nebraska Street

Observations

Site Conditions

• This two-story building is situated between the baseball and football fields and includes concessions, toilets and storage on the ground level and an office and meeting room on the upper level.

Facility Conditions

- Building was constructed in 2004.
- Measures approximately 30 ft x 30 ft.
- Slab on grade at ground level and wood framed second floor.
- Brick exterior with wood stud and drywall back-up.
- · Aluminum fascia and soffits.
- Asphalt shingle roof.
- Upper level accessed via a wood stair platform on the south side of the building.
- · Building in good condition. Exterior wood stair and platform beginning to show signs of deterioration.

Health, Safety, and Compliance

· None listed.

Users and Context

- Users include younger children, parents, teachers.
- Falcon Football patrons.
- · Context includes Main Park, single-family residential, and institutional.

Programming

· Falcon Football

Park and Facility Inventory Frankfort Park District Comprehensive Master Plan

Needs Assessment

Chapter Four: Needs Assessment

Purpose

This Chapter of the report documents the recognized trends in the recreation industry and specific input received by the Frankfort Park District community. Prior to the commencement of this master plan, the District staff and board participated in Capital Improvement prioritization workshops. These workshops produced information relating to new facilities, open space acquisition, park development, park improvements, and building and facility improvements. A Community Input Survey was also completed prior to the master plan process, and the results of this survey are documented in this chapter. This chapter provides a comprehensive profile of the Board, staff, and community's needs and desires for the future of the District.

Research

National Trends

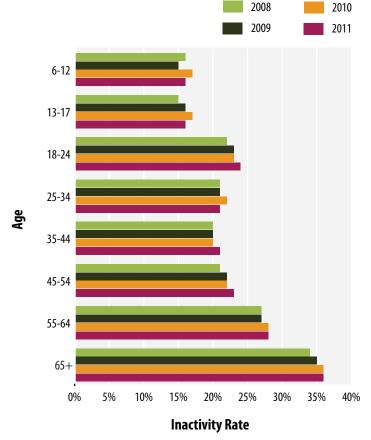

Understanding park and recreation trends helps to determine probable demands for services and amenities. Recreation trend reports were compiled from credible sources to explore what trends were being recognized at the national level. Trends in park agency functions, such as responsibilities, staffing, volunteers, budgeting, programming, and operations and maintenance are also described.

In 2012, the **Sporting Goods Manufacturer's Association (SGMA)**, now known as the Sporting & Fitness Industry Association, commissioned a statistically valid survey of over 38,000 Americans to find out what physical activities they participate in - both indoor and outdoor. The report measured participation in 119 sports and activities and weighs the results against a total population of 283,753,000 ages six years and up. The following variables were used: gender, age, income, household size, region, and population density.

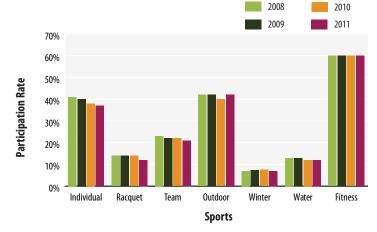

The survey reveals that 76% of Americans have participated in some activity in the last 4 years; however, the general trend is that Americans have become more inactive with the rate of inactivity increasing from 21.5 percent in 2007 to 23.9 percent in 2011. Inactivity increased among young adults aged 18 to 24 and, adults 35 to 54. Conversely, inactivity rates fell slightly among children ages 6 to 12 from 16.6 percent in 2010 to 16 percent in 2011. This decrease may be a result of efforts towards the fight against childhood obesity. Additionally, for adolescents ages 13 to 17, inactivity fell from 16.7 percent to 16.4 percent which, although modest, is a step in the right direction. Notably; however, the State of Illinois ranks 10th among the most active states in the nation at 53.6%.

Categories of participation analyzed in this survey are, in particular, individual sports, racquet sports, team sports, outdoor sports, winter sports, water sports, and fitness sports. The chart to the right reveals that while individual, racquet, team, and winter sports have seen a slight decrease, outdoor, water, and fitness sports have held steady.

Detailed tabular data for the SGMA/ SFIA Topline Report can be found in the Appendix.

As a nation, most active Americans do not plan to spend money on sports and recreation. Of those who do spend money on sports and recreation, they plan to increase their future spending. Increased spending will likely be seen in lessons, instruction, and camps (24.5%); individual sporting events (23.1%); and team sports at school (22.8%).

In general the SGMA/SFIA Topline Report reveals:

- Participation in outdoor sports, like camping and hiking, saw an increase in overall participation, and indoor fitness sports, like yoga and boot-camp style classes remained the most popular fitness activity with a participation rate of 60%.
- Activities that remain significant opportunities to engage inactive populations are swimming, working out with weights, working out with machines, and biking. These four activities remain the most popular "aspirational sports" for ages 6-45. Aspirational activities are those that respondents show a desire or demand to participate in the following year.
- There is an expressed desire to increase the amount of travel done for participation in favorite sports and recreational activities.

The SGMA / SFIA Survey revealed that one of the best ways to increase activity and participation later in life is to encourage casual play at the younger ages and in school through Physical Education. The survey points out that an adult who participated in Physical Education while in school is four times more likely to participate in a racquet sport and about three times more likely to participate in golf, team, outdoor, and winter sports. Through the institution of more opportunities for casual play, there is strong correlation that it translates the casual play into a core activity later in life.

In particular, the survey examined the difference between Generation X and Generation Y population. Generation Y (born 1980-1999) are twice as likely to take part in team sports then Generation X (born 1965-1979). Although much is explained by the age difference, the psychological tendency of Generation Y is more positively disposed to team sports than their Generation X predecessors who are more individual in nature. Generation Y are also more social in their interactions in terms of:

- The way they play (gravitating towards team sports)
- The way they exercise (including a tendency to participate in group exercise)
- The way they communicate (Social Networking, Facebook, Twitter)

The economy has also had a slight impact on sports and recreation spending. While many active people are still not spending money on sports and recreation, more people spent the same amount or increased spending, rather than spending less.

In order to increase participation, knowing the trends and what various users groups are interested in participating is crucial. Significant changes in specific activities (both increases and decreases) over the past 2 years are summarized and listed below. This data in extracted directly from the PAC study, 2012, SGMA Participation Topline Report © 2012 SGMA Research.

Team Sports

Over the last two years, there has been a slow but steady decrease in team sport participation. These include decreases in baseball, football, softball, and wrestling. Trending growth in the newer more evolving transplant sports like Lacrosse continue to grow at significant rates.

| Baseball | -6.0% |
|-----------------------|--------|
| Basketball | -1.4% |
| Football (tackle) | -11.0% |
| Ice Hockey | 5.6% |
| Lacrosse | 29.1% |
| Gymnastics | 22.1% |
| Softball (Fast Pitch) | -3.1% |
| Softball (Slow Pitch) | -14.9% |
| Soccer (outdoor) | -2.1% |
| | |

General Fitness

Class based fitness and exercise programs like Zumba continue to drive positive participation performance for these types of fitness activities. Group cycling continues its rapid growth as the younger fitness enthusiasts embrace this high performance group exercise activity as well as program variations to attract the beginner participant are developed.

102 Frankfort Park District Comprehensive Master Plan Chapter 4

For most age groups, swimming for fitness or weight training are the most frequently mentioned activities that people indicate they would like to participate in.

While Pilates has shown an incredible 10 year growth trend, the past 2 years have seen a decline in participation. Perhaps participation migrated to Yoga, as participation is up across all levels for the year. Yoga is more class based while Pilates is more of an individual activity. The Gen Y fitness participants are showing a higher propensity to go with group oriented programs. Running and Walking for Fitness continue to show strong and consistent growth. Running participation has grown 17.8% in the past two years.

| GENERAL TO A CONTROL OF S S Aerobics (High Impact) | 23.4% |
|---|-------|
| | |
| Aerobics (Low Impact) | 4.1% |
| Elliptical | 14.8% |
| Running/Jogging | 17.8% |
| Stationary Cycling (Group) | 29.2% |
| Treadmill | 5.7% |
| Walking for Fitness | 1.7% |
| Abdominal Machine | -4.9% |
| Pilates | -3.0% |
| Stretching | -4.4% |
| Yoga | 16.8% |
| Home Gym | 1.8% |
| Weight/Resistance Machines | 1.2% |

INDIVIDUAL SPORTS

Much like the trends for individual fitness participation, most individual sports are showing significant declines across most levels of participation. Exceptions include trail running (+10.9%) and triathlon participation (+46.9%).

| Billiards/Pool DOTTS | -20.0% |
|----------------------|--------|
| Golf | -5.2% |
| Martial Arts | -24.2% |
| Scooter Riding | -15.7% |
| Skateboarding | -16.7% |
| Trail Running | 10.9% |
| Triathlon (Road) | 46.9% |
| Table Tennis | 1.7% |
| Tennis | -4.2% |

OUTDOOR SPORTS

Compared to previous years, outdoors sports and seen a significant increase in participation. Bow hunting has seen the greatest increase compared to all other outdoor sports.

| 5.4% |

The **Outdoor Foundation**, in association with the Outdoor Industry Association, produces The Outdoor Recreation Participation Report, an annual report that tracks American outdoor recreation trends with a focus on youth, diversity, and the future of the outdoors. The 2012 report is based on an online survey of over 40,000 Americans, covers 114 different outdoor activities.

According to the report, nearly 50% of Americans, or 141.1 million people, participated in outdoor recreation in 2011. Almost half of all participants made an outing at least once a week, while 29% made outings two or more times a week. Outdoor recreation reached the highest participation level in five years, adding more than 3,000 participants.

Although more youth ages 6-17 are participating in outdoor activities (one percentage point more per age group from 2010), youth still do not spend enough time outdoors. Forty percent take part in outdoor activities less than twice a month and the average outings per youth participant is down from 98 average outings per year to 81. This suggests youth are not getting the recommended 60 minutes of physical activity every day.

Although young adults made one billion fewer outings than youth--1.6 billion compared to youth's 2.6 billion-- each participant averaged 16 more annual outings than youth participants (97 compared to youth's 81).

TOP

Outdoor activities for American youth, ages 6-17, by number of outings are:

- Running, Jogging, and Trail Running
- Road Biking, Mountain Biking, and BMX
- Skateboarding
- Freshwater, Saltwater, and Fly Fishing
- Camping

TOP

Outdoor activities for American young adults, ages 18-24, by number of outings are:

- Running, Jogging, and Trail Running
- Road Biking, Mountain Biking, and BMX
- Freshwater, Saltwater, and Fly Fishing
- Bird watching/Wildlife Viewing
- Hunting

The National Recreation and Park Association (NRPA)

released their 2013 Parks and Recreation Database Report, a report summarizing trend information derived from their online PRORAGIS application. PRORAGIS is a tool designed to assist park and recreation leaders in their need to continually examine and communicate the value of parks to their communities. The report is derived from an online database of information provided by park and recreation professionals about their respective district, departments, or organizations. In all, 383 agencies are represented in this data.

Based on the information they received over the past three years, the following trends were concluded:

- Areas of increased agency responsibility include conducting special events, maintaining public jurisdiction areas, and administering community gardens.
- Area of decreased park and recreation agency responsibility include managing major aquatic complexes and providing environmental education and natural history programs.
- Staffing and hiring, while still lower than 2010 numbers, is increasing while volunteer numbers declining.
- November 2012 saw the largest number of park and recreation capital ballot referendums since 2008. In general, they passed with about 67% of electoral support. This indicates an improved public confidence in the future economy and their support of park and recreation services.
- While attendance at programs, classes, and events is rebounding from past decline, the actual number of program offerings has declined in every major category since 2010.

D4 Frankfort Park District Comprehensive Master Plan Chapter 4

LWCF & OSLAD Grant priorities:

- Conservation of Natural Resources
- Children in the Outdoors
- Greenways and Trails
- Revitalized Lands
- Water Resources
- Special Populations
- Healthy Communities
- Interagency Cooperation and Coordination

State of Illinois Recreation Trends and Needs
According to the 2009-2014 Statewide Comprehensive
Outdoor Recreation Plan (SCORP), while other states in
the Midwest, have been experiencing flat population growth
or even loss of population, Illinois has consistently gained
residents. Especially in the state's urban areas, many of these
new residents are more ethnically diverse and have different

new residents are more ethnically diverse and have different outdoor recreation preferences. Planning must consider their needs. Other segments of the population that will require attention include those with disabilities and lower incomes.

There are more than 1.4 million acres of outdoor recreational land in Illinois ranging from federal and state lands to schools and private commercial lands. City/Village and Park District outdoor recreation lands total an estimated 146,000 acres, resulting in a supply of 11.35 acres per 1,000 population. Statewide supply of regional recreation is 52.69 acres per 1,000 population, or 216,000 acres. This includes county and state lands.

For the 2009-2014 SCORP, The Illinois Department of Natural Resources conducted a survey that provides a snapshot of the attitudes toward selected outdoor activities within the state. Taken by over 1,500 Illinois residents in both urban and rural areas, the survey shows that most residents participate in some outdoor activities and most believe they are important and should be available, even if they do not participate in them.

Key findings of the survey include:

- The most popular outdoor activity across the state was pleasure walking, with 83% of respondents participating in the last year. Picnicking, bird watching, swimming, and using a playground were also the most popular activities. The least popular activities included trapping, snowmobiling, cross-country skiing and sailing.
- Activities that experienced the most growth in rural counties were fishing and hunting, while activities that expected growth in urban counties were walking and biking.
- Most respondents (35%) indicated the state government was the most important provider of outdoor recreational amenities, followed by local (31%), county (20%), federal (9%), and the private sector (6%).
- Most residents reported being satisfied with outdoor recreation facilities in the state. Nearly half said the facilities have remained the same as previous years, while about one-third believed they have improved.
- Nearly half (43.5%) of respondents indicated activities they would like to start or start doing more often.
 Indicating Illinois residents are interested in outdoor activities.

Based on outdoor recreational land supply and demand and the information derived from the survey, eight basic principles were developed to help guide the Land and Water Conservation Fun (LWCF) and the Open Space Lands Acquisition and Development (OSLAD) grant evaluation process. These priorities are used to evaluate grant applications and determine funding for municipalities, park districts, and other agencies responsible for park and open space development. A list of these priorities can be found in the grey box to the left.

Needs Input Phase

Stakeholder and Focus Group Input

Stakeholder and focus group meetings were conducted by Heller & Heller in August, September, and October of 2011. The goals of these community meetings was to gather information and input on significant concerns about the Park District. The results of this process aided Heller & Heller and Leisure Vision, Inc. in developing the Community Survey questions which was administered in the Winter of 2011. Stakeholder meeting participants included the following community groups:

- Seniors
- Park District Staff
- · Park Board
- Parents, adults, and administrators of High School District 210 and Grade School District 157c
- LWSRA
- Chamber of Commerce
- Village Trustees
- The Mayor of the Village of Frankfort
- Village Administrators
- · Operation Playground
- Athletic Associations

DISTRICT Strenaths

- Friendly and attentive staff
- Splendid, accessible parks and wealth of land
- Great programs that reach all age groups, especially young children
- Athletics

DISTRICT

- Add and increase fitness opportunities
- Add shade to parks and clean up large open spaces
- Outdoor pool and Pavilion
- Extend Day Camp into August
- Partnerships / Cooperations

ISTRICT _____

- Lack of active indoor facility space
- Could increase tax rate to respond to funding challenges
- Lack of long-term vision
- Sports organization vs. public use in park spaces
- Poor credibility
- Communication and transparency

DISTRICT

- Increase beautification through parkland with weeding, shade, and benches
- Increase comfort features such as parking, trash cans, and port-o-lets
- Provide new community center with indoor fitness, specialized program rooms
- Improve splash pad
- Provide senior center, mini golf, batting cages, and / or in-line skating
- Provide outdoor pool with swim lessons

Community Survey

Previous to the development of the Master Plan, a Community Survey was distributed and administered by Leisure Vision in 2011. Surveys were randomly sent to 2,000 households. The survey has relevancy to recreation program offerings; therefore, a few of the results are included as part of the Recreation Assessment. The goal of the survey was to receive 400 completed surveys and there were actually 402 responses. Analyzing these results will help provide suggestions for future programming and/or how to improve upon current program offerings. Realizing who is using services and the reasons why they may not, will also provide invaluable leads to marketing strategies as well as service placement.

Survey Toplines:

- Main Park and Commissioners Park are the most used parks and facilities.
- Excellent rating for conditions of parks are significantly higher than national benchmarks.
- Overall program quality excellent or good is 85%.
- Organizations used for recreation: Library 54%, Park
 District 50%, and school 34%. In most communities,
 the park district receives the highest percentage of
 users. Since the time the survey was distributed in
 2011, programs have expanded, so there is probability
 the park district would now receive a higher
 percentage.
- Ways households find out about programs:
 - Program guide 87% (this compares to Leisure Vision's national database of 50% and Illinois 78%)
 - 2. Newspaper 40%
 - 3. Word of mouth 34%
 - 4. Website 32% (Illinois database comparison is 34%)

- The two top reasons for households not participating in programs includes: Program or facility not offered 33% and too busy 30%.
- Satisfaction with overall value is 56%, as compared to 62% nationally and 66% Illinois (very or somewhat satisfied). This is an area that can be targeted for improvement, by providing educational information to households.
- Participation in programs and excellent ratings of program quality are higher than National and Illinois benchmarks. 44% of households participated in programs, as compared to 34% nationally and 39% in Illinois. This reflects very good performance.
- The Park District brochure is, by a wide margin, the most used source of marketing.
- Slightly over two-thirds of respondents are aware that the Frankfort Park District is a separate taxing body / entity than the Village of Frankfort.
- Walking and biking trails, outdoor swimming pools, water parks, and indoor fitness and exercise facilities are the most important parks, trails and facilities.
- Fitness programs are the most important programs
- Opportunities exist to grow programs of importance.
- There is significant support for developing indoor space.
- A majority (61%) of households would favor paying some additional level of taxes for facilities and programs most important to their household.
- 59% of households feel the Park District is very important to the overall quality of life in Frankfort.
 Only 5% feel it is not important.

Park Facility Needs

A critical part of the planning process is understanding both the park land holdings of a park district as well as the facilities each park has to offer. Comparing this information with national, state, and local participation trends helps paint a better picture of how the Park District compares to its context as well as how they are responding to the local needs and expectations of the district's residents.

The table to the right was derived from the Illinois Statewide Comprehensive Outdoor Recreation Plan (SCORP). It compares the estimated supply of recreational amenities provided within the state of Illinois to the number of amenities provided by the Frankfort Park District on a per 1,000 population basis for the existing population of the District. The Illinois Department of Natural Resources uses this table to evaluate and prioritize grant funding assistance based upon how the District compares to the state and national averages, as well as how the District responds to the eight priorities described in the 2009-2014 Illinois Statewide Comprehensive Recreation Plan. The National Recreation and Parks Association (NRPA) has also established standards for facilities per 1,000 population that are illustrated in the last two columns of the table. This table excludes those amenities that are beyond their useful life. For useful life criteria see the Appendix, Chapter 7.

Existing Parks & Current Population

The line items highlighted in the red boxes are amenities the Frankfort Park District is deficient in compared to the state and/or national average. Items that meet or exceed the state or national averages are not highlighted. These are items the IDNR will prioritize for grant funding. This table is based off the current 2012 population of 15,244.

| | Existing Population (15,244) Frankfort Park District Illinois Facility Average NRPA Facility Average | | | | | ity Average |
|------------------------------------|--|------------------------------|--------------------|----------------------|------------------------------|------------------|

Existing Parks & Projected Population

As indicated in the table to the left, as population increases and additional parks develop, it is important that the parks provide facilities for active recreation. The line items highlighted in red are the amenities the District is projected to be deficient in. This is based off the projected population of 16,741.

Facilities the District will need by the year 2017 are as follows:

- Fishing Piers, Docks, Access
- Boat Launch Ramps, Access
- Tennis Courts
- Golf Courses
- Running Tracks
- Horseshoe Pits
- Ice Rinks

Recreation Program Assessment

Program Priority Matrix

The following chart shows programs categorized in three levels of priorities: high, medium, and low. This information is based on a ranking of programs from three variables included in the Community Survey. The three variables include:

- · Q9: Respondent Households that have a need for various Sports and Recreation Programs
- · Q9b: Estimated Number of Households in the Frankfort Park District Whose Needs for Recreation Programs are only being 50% met of less
- Q10: Recreation Programs that are most Important to Respondents Households

The programs included in green should receive priority in the future. This suggests these program areas can be expanded in number of offerings, if space exists. Conversely, the programs in the blue section of the spreadsheet are not as important to the community. Most of the low priority programs are geared toward youth participants, while adult programming is particularly emphasized by the green, or high priority programs. It is also important to note the low scoring of special population programming. This is a result of a smaller population of potential registrants for programs, and not a result of a lack of importance attached to these programs.

| _ | | | | | | | Total Rank |
|---|------|------|--------|------|-------|------|------------|
| Programs | Q9 % | Rank | Q9b. # | Rank | Q10 % | Rank | Score |

Total Rank

Chapter 4

High priority Medium Low Priority

Summary of Parks and Recreation Needs Assessment

Frankfort Park District will continue to grow into 2017. Population will increase by almost 10% and age group distribution will drastically change--with seniors and active adults (65+) consisting of 14% of the total population.

In order to accommodate more outdoor participants, aging facilities must be updated and deficient facilities must be addressed. As with any park district, it must be a carefully executed balance of replacing aging facilities while expanding and adding new parks and amenities to the system. All parks should be updated to ensure they meet current safety and accessibility standards. Deficiencies revealed in the community survey and facility needs assessment should also be addressed over time. Items to consider are tennis courts, golf courses, ice rinks, canoe access, and ski trails.

Not only are more people are going outdoors for recreation, but the national results show that attendance at programs, classes, and events is also rebounding from past decline. Locally, health and fitness ranks as the most important programs for residents of all ages. Indoor fitness sports, like yoga and boot-camp style cardio classes, remain the most popular fitness activity. Significant opportunities to engage inactive populations are swimming, working out with weights, working out with machines, and bicycling.

National, statewide, and local results show people are also increasingly supportive of park and recreation services. November 2012 saw the largest number of park and recreation ballot referendums since 2008. Locally, Frankfort Park District residents who use District facilities and services are satisfied with the District. The most used parks are Main Park and Commissioners Park.

Nationally, sports and recreation spending is not expected to increase. However, of those who spend money on sports and recreation, spending is expected to increase. Locally, Frankfort Park District residents are willing to pay some additional level of taxes for facilities and programs with 61% of households stating they would vote in favor of the increase. There is also an expressed desire to increase the amount of travel done for participation in favorite sports and recreational activities. These results indicate people are becoming more confident in the future economy and in park and recreation services.

Strategies & Recommendations

Chapter Five: Strategies & Recommendations

Purpose

The Strategies & Recommendations Chapter contains the goals and recommendations necessary for the Frankfort Park District to meet the recreational needs of the Park District community. These recommendations are the synthesis of the Inventory & Analysis and Needs Assessment data documented in the previous chapters. Through internal charrettes and staff and Board workshops, primary, long-term and ongoing initiatives were discussed, outlined, and prioritized resulting in the strategies set forth in this chapter.

This chapter outlines the long-term vision for the District. Strategies and recommendations are grouped into five separate categories:

- District-wide Strategies
- · Existing Asset Strategies
- New / Planned Asset Strategies
- · Trails & Linkages
- Recreation Programs & Services Strategies

District-wide Strategies

- Create Neighborhood Park Prototype
 - Establish standards for acreage, design, and amenities.
- Get involved with Municipal Park Planning for park land dedication (location and configuration)
 - Communicate Neighborhood Park Prototype standards to Village Planners to collaborate on the developing and planning for Frankfort's park system.
- Embrace meaningful access to existing natural areas for passive recreation and interpretation
 - Implement trail connections, interpretive signage, and other appropriate amenities to encourage access and use.
- Understand the FPD potential boundary expansion to the south
 - Work with Village Planners to understand Village growth patterns and plan for the needs of future residents in future growth areas.

Existing Asset Strategies

The following tables outline the strategies and recommendations for all existing park and open space. Strategies are outlined as primary initiatives, or actions that should occur within the next five years, and long-term initiatives, or actions that will occur after 2017.

Neighborhood Parks

| | Brookmeadow Park | Butternut Creek Woods Park | Heritage Knolls Park | Indian Boundary Park | Kohlhagen Park | Lakeview Estates North Park | Lakeview Estates South Park |
|--------------------------|---|--|--|--|---|--|---|
| Primary Initiatives | Develop stone outcropping fishing stations | | Develop new park master plan Replace playground (installed 2001) Update playground container to Park District standard | | Develop new park master plan Develop stone outcropping fishing stations | | |
| Long-Term Initiatives | Develop park shelter Develop fishing overlook | Provide additional native plantings Provide education opportunities (signage/ programs) Option #1 | | Provide trail connections to Old Plank Trail Develop internal pathways to amenities Develop park shelter | Develop park shelter Develop fishing overlook Provide native vegetated shoreline Develop internal pathways (north side of pond) Provide trail connection to Old Plank Trail Replace playground (installed 2003) Update playground container to Park District standard | Provide trail access to natural creek area Provide additional education opportunities (signage/ programs) Option #2 Develop stone outcropping fishing stations Consider decommissioning existing softball field | Develop trail along pond (west side) Provide trail access to natural creek area Develop stone outcropping fishing stations Provide additional education opportunities (signage/programs location option #2 |

Neighborhood Parks

| | Lincoln Meadows Park | Michele Bingham Memorial Park | Roy & Dorothy Janssen Park | Sandalwood Park | Shaffer Park | Timbers Edge Park | Windy Hill Park |
|--------------------------|---|--|--|---|-------------------------|---|--|
| Primary Initiatives | Replace playground (installed 1993) | Implement existing park master plan Develop off-street parking lot (asphalt paving) Provide exercise stations – Option #1 | | | | | Replace shelter within the next five years |
| Long-Term Initiatives | Develop park shelter | Develop internal pathways to amenities Develop trailhead with restrooms (primary Old Plank Trail access) - Village Cooperation Provide trail wayfinding signage Provide additional shade/buffer throughout park Provide native plantings | Provide native vegetated shoreline Incorporate additional two acres of Old Stone Village Park | Replace playground (2003) within next five years Develop park shelter Develop stone outcropping fishing stations Develop internal pathways | Develop park shelter | Replace shelter Develop pedestrian connection to Sauk Trail Reservoir Provide trail access to natural creek area Provide additional education opportunities (signage/programs) Option #3 | Develop trail connection from 88th Ave. to park. Promote Old Plank Trail use Provide trail wayfinding signage Provide native landscaping Provide support amenities for winter activities |

116

Community Parks

| | Commissioners Park | Jackson Creek Park | Main Park |
|--------------------------|---|---|--|
| Primary Initiatives | Develop new park master plan Replace splash pad within the next five years Pave west parking lot Establish native plantings for unprogrammed turf areas | Develop new park master plan with Sara Springs Park Develop future links to Sara Springs Park | Develop new park master plan with Puent and Village Hall site Evaluate opportunity for synthetic turf for football field Provide basketball courts (in-progress) Develop looping trail system (west side) |
| Long-Term Initiatives | Develop consistent field sizes Develop satellite maintenance facility Create efficient land-use arrangement Provide batting cages – location Option #1 Provide miniature golf Redevelop trail system (8' width minimum) Develop in-line/ice hockey skating area | Develop shade structure near basketball/skate park Develop large shelter with outdoor fireplace Provide trail access to natural creek area Develop bridge connection from south trail to pond loop trail | Provide batting cages – location Option #2 Provide exercise stations – location Option #2 |

New / Planned Asset Strategies

This section outlines strategies and recommendations for new or planned assets. These strategies relate to acquisition or development of a new facility or redevelopment of a facility or open space the Park District currently owns, but has not developed, planned, or programmed yet. This section addresses Undeveloped Parks, Indoor Maintenance Facilities, Indoor Recreation Facilities, and Acquisition Strategies.

Undeveloped Parks

| | Majestic Pine Park | Janssen South Park | Sara Springs Park | Stone Creek Park |
|--------------------------|---|--|---|---|
| Primary Initiatives | Develop park program and park master plan | Develop park program and park master plan | Develop park program and park master plan Consider acquisition for vehicular access from LaGrange Road | Develop park program and park master plan |
| Long-Term Initiatives | Develop Majestic Pine Park and Stone Creek Park in conjunction | Provide connections to Roy and Dorothy Janssen Park | Consider native restoration Consider natural trail system with access to creek Provide connection to Jackson Creek Park | Develop Majestic Pine Park and Stone Creek Park in conjunction |

Satellite Maintenance Facility

Primary

Initiatives

The Frankfort Park District community will continue to grow into the next five years. The population is estimated to grow by almost 10% and growth will be concentrated on the southeast corner of the District. The Building and Grounds Facility is currently located on the south side of Main Park, a notable central location within the current District limits. Because of the growth patterns, planned unit developments, and the additional open space that will come along with the developments, an additional satellite maintenance facility is recommend to address the District's growing needs.

Aquatics

Primary

Initiatives

Initiatives

The Frankfort Park District does not currently own or operate an indoor or outdoor aquatics facility. While the main priority for the District is a new recreation center, aquatics may also become a priority as it could be developed in conjunction with the new recreation center. The District is currently deficient in indoor aquatics space, but if developed with the new recreation center, the deficiencies could be fulfilled.

Maintenance

Satellite Facility

Consider Commissioners Park

Develop satellite maintenance facility
 Long-Term
 Initiatives

Aquatics

Aquatics Facility

Develop outdoor aquatics

Long-Term • Commissioner's Park

Could be in conjunction New Recreation
Center

- Main Park
- Acquire new park land for aquatics

Indoor Recreation Facilities

The Frankfort Park District does not currently own or operate an active recreation and fitness center for residents. Indoor programmable space available to the District is concentrated in The Founders Community Center and Susan A. Puent Educational Facility. The Susan A. Puent Education Facility is currently programmed solely for pre-school classes and activities. While The Founders Community Center includes a small gym and locker rooms, this space is not equipped to handle the District's growing active indoor recreation needs. For indoor active recreation and fitness, private gyms and fitness centers currently provide services to the District.

Justification for Indoor Recreation Strategies:

- Deficient in indoor space by +/- 400 square feet. The
 District will be deficient by more than 3,300 square
 feet by 2017. None of the current indoor recreation
 space is dedicated health and fitness space.
- Adaptive reuse of Founders Community Center or Susan A. Puent Education Facility is limiting for active recreation.
- LWSRA will be vacating the Founders Community in March 2014, leaving the building open for additional programming.
- Board and staff workshop results indicate an interest in indoor fitness, gymnasium space, and indoor court space.
- Survey programming related questions indicate a need for adult fitness, aquatics, health and wellness, and active adult programs
- Survey facility related questions indicate indoor running / walking tracks, indoor fitness and exercise facilities, and indoor swimming pools as unmet and useful needs.

Frankfort Park District Comprehensive Master Plan

Construct New Recreation Center and Repurpose Founders Community Center as "Education Center" (35,000-45,000 GSF)

Adapt FCC to be all classroom-related space. Relocate Pre-school programs from Puent to Founders. Senior Center, drama, instruction, crafts, culinary, ceramics (kiln) programs. New Recreation Center to include multi-purpose rooms, multi-court gyms, fitness, track.

New center to include board room.

• Appropriate use of FCC layout

• Change in land-use

Main Park
(demo Puent & construct new
Recreation Center)

- Near Downtown Location
- Access
- Adjacency to sports at Main
- · Adjacency to Village Hall
- Potential Village Partnership Opportunity (share infrastructure)

CONS

• Repurpose Main Park (north open space)

New Site - Acquire Land

• Purpose driven acquisition based on selected criteria

Chapter 5

- Potential public-private partnership Opportunity
- Land acquisition
- Must address Puent vacancy

userui needs.

Sell Founders Community Center, acquire / lease Prairie Park, and Build New Recreation Center (50,000-60,000 GSF).

Work with Village to acquire Prairie Park and build fitness / active recreation center. Potential intergovernmental agreement.

- Location
- Trail Access
- Outdoor Recreation Opportunities

- ONS Potential negative community response for selling the Founders Community Center
 - Property size limitations / parking constraints

Acquire Existing Facility (50,000-60,000 GSF)

Target existing indoor facility appropriate for redevelopment for fitness/active recreation.

• Purpose-driven acquisition based on selected criteria (location, access, adjacent open space, etc)

- Acquisition/Purchase Price
- Renovations may be necessary

Renovate Founders Community Center as Recreation Center (25,000-30,000 GSF)

Renovate and Expand for appropriate indoor space (fitness, track, gymnasium, multi-purpose rooms).

- Location
- Known amenity/destination
- History
- No acquisition needed

- School building structure difficult to renovate
- Limited space for expansion
- Parking Limitation

Demo Founders Community Center and Rebuild New Recreation Center (50,000-60,000 GSF)

Founders Community Center Location (demo old, build new)

- Nostalgic Amenity, valued by community
- Property size limitations / parking constraints

Conclusion

Out of these five strategies, Strategy 1 rose to the top as the most realistic and feasible for the Park District. Strategy 1 will fulfill staff and programming needs for Founders and will provide a new purpose-driven recreation center that will more adequately fulfill resident's expectations and desires. Relocating the pre-school to The Founders Community Center would utilize the building efficiently and will fill the vacancy left by the Lincoln Way Special Recreation Association as they relocate to their new facility. Vacating Puent provides the opportunity for additional Community Park space or for a municipal campus-like development with the planned Village Hall expansion.

Acquisition Strategies

As the plan developed, it became apparent that while the District is already serving their residents well in many ways, there are deficiencies that could be fulfilled through future acquisitions.

By NRPA standards, the Frankfort Park District is deficient in Community Park space. As the population increases and growth expands out towards the south-east, an additional Community Park acquisition will become a high priority. The District currently does not have natural areas or nature programming, and according to the results of the community input survey, this would be a welcome addition to the District offerings. Acquiring land for this purpose would fulfill these needs.

Not only would acquiring additional park space benefit the District, but acquiring land to construct the desired Recreation Center would also fulfill the District's needs as they do not currently own or operate such a facility. With the sole, central Buildings and Grounds Facility located in Main Park and growth expanding towards the southeast, Buildings and Grounds staff must travel far with their equipment to maintain parks in that area of the District. As the community grows, a satellite maintenance facility would aid the buildings and grounds staff in maintaining parkland in a timely and efficient manner. As the District continues to grow, the Park District should remain open to considering private and / or intergovernmental partnerships for acquisition opportunities.

Justification for Acquisition Strategies:

- The District is sufficient in overall outdoor park space; however, the District is deficient in Community Park land by +/- 9 acres.
- There is a lack of park space in the areas of projected population growth.
- As the District grows, the Building and Grounds facility will be less centralized within the District. A need for a satellite maintenance facility will arise.
- Board and staff workshop results indicate an interest in additional acquisitions for open space, satellite maintenance facilities, indoor recreation space, and natural areas.
- Survey results indicate that walking and biking trails, outdoor swimming pools, indoor fitness, and water parks are most important to residents.
- Survey results indicate that maintenance of parks should receive the most attention in the next two years.

Trail Corridors & Linkages

The distribution of trail assets is notable; however, some of these trails lack direct connections to the Old Plank Road Trail and are isolated within subdivisions and residential areas. Filling in these gaps would create a more cohesive trail network. Some of the proposed trails do address the gaps in the trail system, but additional linkages to address are seen as red lines with bulleted ends.

Currently, the only trailhead within the Park District is located at Prairie Park—a Village-owned park north of the Old Plank Road Trail. Four of the District's parks are along the regional trail system— Kohlhagen Park, Michele Bingham Park, Indian Boundary Park, and Windy Hill Park. A trailhead is a location along a trail where amenities such as parking, benches, bike racks, and drinking fountains occur to offer a place to get on and off the trail.

Recommendations include:

- Work with the Village to implement trails so that all residents are within 1/2 mile walking distance from a trail.
- Work with Village to make strategic and direct connections to the Old Plank Road Trail.
- Work with the Village to fill in gaps between parks, trails, and Village destinations.
- Consider locating trailheads at parks along the Old Plank Road Trail. Specifically, consider Windy Hill Park, Michele Bingham Park, and Kohlhagen Park.
- Explore trail opportunities within ComEd corridors.
- Explore opportunities for loop trails within parks. Ensure loop trails have connections to the neighborhood pedestrian system.

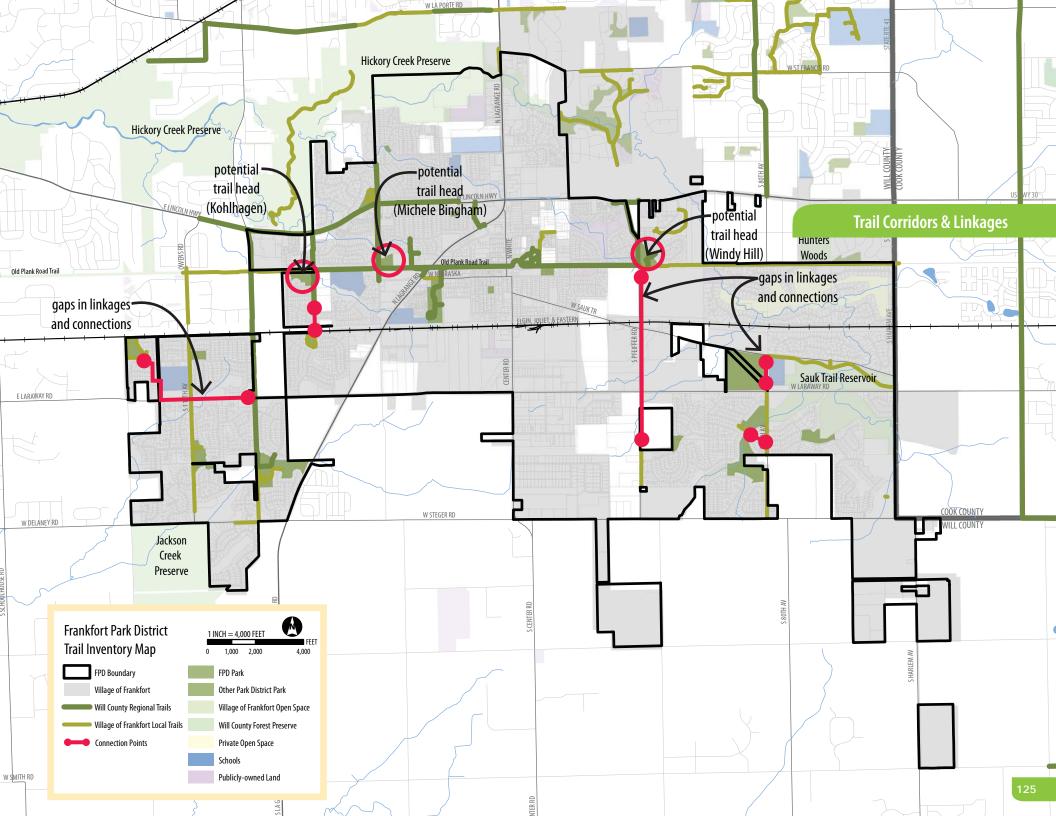

Bike Lane

Shared Roadway

Shared Roadway

Recreation Strategies and Recommendations

- Adult and senior programming in the Brochure are mixed together. Although anyone over the age of 18 can register for adult programs, seniors typically are weary of programming with much younger participants. Separating adult from senior programs, perhaps on pages that open next to each other, can increase senior program participation. Participants can then easily view specific programs geared towards their age group. It still is beneficial to address that all adult ages are welcome to participate in adult programs.
- There are a few programs in the adult program section that the participation ages were 11 and up (Fresh New You) and 12 and up (HeartSaver CPR).
 It would help to also include these in the youth program section of the Brochure so they are not overlooked in the adult section.
- The placement of pages can be of vital importance when laying out a Brochure. Typically the first few pages are made available for the most important information you want your community to learn about. However, there are many ideas on what information should go where. General information is usually important, but this information is also usually in every Brochure, each time. Placing this information in the rear of the Brochure will give way for pages like special/community events or community favorites.

- There is an entire page on the Website dedicated to customer service, yet there is a small box of this information in the Brochure. Since the "Frankfort Park District is committed to providing responsive, friendly, courteous and excellent service to our customers," it may be a good idea to increase the size of this statement in the seasonal Brochures. Most residents are typically finding out about information from these over the Website.
- Grammar and language consistencies are also important, including: the same amount of spaces after times/dates, using the "age" or "ages" term, phone number consistencies and using consistent order for program descriptions, i.e:

| Instructo |
|-----------|
| Location |
| Day |
| Date |
| Time |
| Age |
| Fee |

- Adding to your current Photograph Policy to include using photographs on any social media that you are currently using.
- Include similar programming together, i.e. music programs.
- There currently are no Theater/Acting Classes.
 There may or may not be a need for these types of programs. If there is not enough community interest, cooperative programming with surrounding Districts and agencies may help offer additional programs for residents at in-district rates at other locations than Frankfort.

- With the intergovernmental agreement with Lincoln-Way East High School, Frankfort residents can workout at the high school fitness center. Including this information on the adult fitness pages can increase awareness for the fitness opportunity.
- There is not a lot of information regarding summer camp opportunities. The first information on it is given in the summer Brochure. With some households, summer planning begins earlier than April. Adding summer camp information in the winter/spring Brochure can assist families conduct their summer planning.
- The addition of a line on the registration form to ask if there is new or current information from the registrant can cut down on registrars continuously reviewing the information when inputting registration.
- Online registration is a convenience for participants. This gives users an opportunity to register 24 hours a day, seven days a week for programs that are available to do so. Currently, online users must pay a convenience fee to register. Although it is a nominal fee, this can be viewed as a deterrent, or not convenient, if someone wants to register online. Reviewing program fees to possibly absorb this "convenience fee" may increase online registrations.
- Currently a girl's lacrosse program is offered. Although there is no boys program, providing details on where boys may find information on programs would be helpful.
- Also providing any "sneak peek at new upcoming programs" could be added.

- A suggestion is to keep program descriptions brief and no longer than six or seven lines, as readers may lose interest if they read too long. Identify the "hook" that will entice people to register. Descriptions should include features, attributes and benefits. Certain titles already state what the participant will be doing in the class.
 Some of the text in the description is informational, rather than promotional.
- Changing the font for both the descriptions and headers can be an easy way to add a catchy new look to draw interest.
- A fresh look to the Brochure is an enhancement for marketing programs and events.
- Consolidating and deleting unnecessary white space, can add room for additional photos and information.

Implementation

Chapter Six: Implementation

Purpose

This chapter lists the action items required to complete the recommendations listed in Chapter Four. These items have been prioritized and targeted for action over the next 5 years, with emphasis on the first five years after plan adoption. Timesensitive action items are both listed below and outlined on the implementation timeline. The first five years is then expanded, outlining specific directives recommended to complete implementation. These directives are guidelines and require an annual review to react to changes within the community, funding opportunities, and new Park District needs.

2013 Action Items

- ☐ Adopt Comprehensive Master Plan
- □ Plan Recreation Center Funding Strategy
- Explore acquisition for Sara Springs access (tenant land off of LaGrange Road)
- □ Construct Michele Bingham Memorial Park playground

2014 Action Items

- ☐ Market Recreation Center Funding Strategy
- $\hfill\Box$ Complete Recreation Center Site Study
- ☐ Master Plan Recreation Center and Evaluate Main Park Synthetic Turf
- ☐ Master Plan the Founders Community Center Renovation
- □ Master Plan trail connections
- ☐ Master Plan Jackson Creek Park / Sara Springs Park
- ☐ Design and Engineer Majestic Pine Park/ Stone Creek
 Park
- ☐ Design and Engineer Janssen Park South / Janssen Park Expansion (if acquired)
- □ Construct Michele Bingham Memorial Park parking lot
- ☐ Construct playground replacement at Lincoln Meadow Park

☐ Pave Commissioners west parking lot

2015 Action Items

- □ Secure Funding for Recreation Center (Referendum)
- □ Acquire land for Recreation Center (if necessary)
- ☐ Design and Engineer Recreation Center and Main Park Synthetic Turf (pending evalution results)
- Design and Engineer the Founders Community Center Renovation
- ☐ Grant strategy for Sara Springs access acquisition
- ☐ Construct Janssen Park South/ Janssen Park Expansion
- ☐ Construct Majestic Pine Park/ Stone Creek Park

2016 Action Items

- □ Master Plan Commissioners Park
- □ Acquire Sara Spring access
- Design and Engineer Jackson Creek Park / Sara Springs Park
- ☐ Grant for playground at the Founder's Community Center
- ☐ Grant for trails
- ☐ Construct Recreation Center and Main Park Synthetic Turf
- ☐ Construct the Founders Community Center Renovation
- ☐ Construct playground replacement at Heritage Knolls Park
- $\hfill \square$ Explore acquisition for satellite maintenance facility

2017 Action Items

- ☐ Construct Jackson Creek Park/ Sara Springs Park
- ☐ Grant for Commissioners Park

MPORTANT Dates

Trail Grants

• Due March 1st

OSLAD Grants

- Due July 1st
- Awards typically announced between February and June

PARC Grants

- Due between October and November
- Two-year cycles
- Currently inactive (2013)

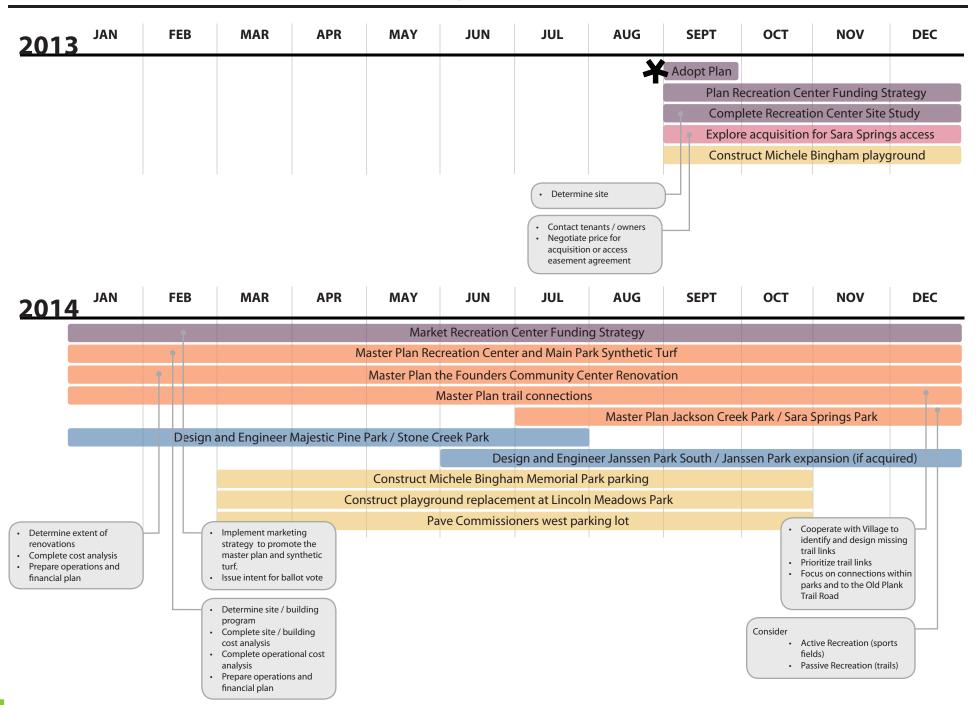

130

IDNR Grant Administration Division Per IPRA-Park & Natural Resource Management Section's Recommendations

USEFUL LIFE CRITERIA

| <u>FACILITY</u> | Expected useful life | Evaluation Criteria – Factor |
|----------------------------|----------------------|---|
| BB/Softball fields | 8-10 years | # Games/week, # Practices/week Grass infields? Maintenance Procedure/Standards Is site used for multiple uses, soccer, football? Is space used for organized or programmed events? Spectator considerations – bleachers Concession stands |
| BB/Softball Field Lighting | 20 years | Pole Type (wood, steel, concrete) Wiring type (aluminum, copper) HID or incandescent fixtures Existing FC vs. new standards Accepted grounding systems? Panel Capabilities/Technology Electrical Code compliance |
| Soccer Fields | 8-10 years | Usage rating A/B/C/D # games/week, # weeks/year, time of year, age of user |
| Irrigation system | 20 years | Irrigated Y/N Usage # games per week Drainage considerations Maintenance standards/levels Is site used for organized or programmed events? To what extent? Is site used for multiple uses? Softball, BB or football |

IDNR Grant Administration Division Per IPRA-Park & Natural Resource Management Section's Recommendations

USEFUL LIFE CRITERIA

| Tennis Courts | Lighted Y/N (Use | BB Criteria) |
|---------------|------------------|--------------|
| | | |

Resurface 12-15 years Surface clay, asphalt, other Total Renovation 20-25 years Color coat/overlay/rebuild

Frequency of color coating Location – high water table Fencing material/posts Preventive maintenance

Location: Water table concerns

Is site used for organized or programmed events? To

what extent?

Are courts used for making ice?

Basket Ball Courts

Same as tennis courts

Resurface 12-15 years Total Renovation 20-25 years

Volleyball Courts Sand / Grass?

Lighted Y/N

Borders

Bleachers/spectator area

Shuffleboard Same as tennis courts

Resurface 12-15 years Total Renovation 20-25 years

IDNR Division of Grant Administration <u>Useful Life Criteria</u> 7/21/97

BUILDING SPACE PLANNING PROGRAM

This form is used to program areas and budget costs for a project in the Programming Phase.

It can then be adjusted during the Design and final project construction.

Typically you only need to enter data in the shaded areas:

PROJECT DATA
